

### Noted Visitors to Times Square Service Men's Center

Captain Paul P. Blackburn, United States Navy (left) and Major General Thomas A. Terry, Commander of the Second Corps Area of the United States Army, are here shown on a visit with Walter S. Mack, Jr. (center), President of Pepsi-Cola Company, to the Times Square Service Men's Center, presented by the latter's organization as a gift to the men of the Armed Forces. During its first month of operations, the Center has been used by over 100,000 Service men, from all over the country on leave in the Big Town. The Center furnishes free of charge luxuriously furnished lounge rooms with reading and writing facilities; radio; piano; check room; shower rooms; telephone facilities; shaving requisites; stationery; games; free beverages, and food at minimum cost. It is operated under the sponsorship of the New York City Defense Recreation Committee.

Answer--Cattle infested with grubs (sometimes called "warbles" or "wolves" should be treated in the following way: Mix a powder containing one part of 5 percent rotenone content derris or cube powder and two parts of wettable sulphur. The powder should be applied to the black of the infested animal with a shaker and rubbed in lightly with the hand. Other methods of control are a derris or cube wash, or the use of a power sprayer in distributing a rotenone-sulphur mixture over the backs of the animals.

Question--What is the best type of milk bucket?  
Answer--Where hand milking is done, a hooded or small top milk bucket is preferred. This type of bucket will exclude about 50 percent of the number of bacteria which usually get into the milk during the milking process. The strainer should be seamless and constructed to use standard filter discs. Milk cans and all other utensils used in handling milk should be of standard construction and free from open seams.

### State College Hints For Homemakers

BY RUTH CURRENT  
State Home Demonstration Agent  
North Carolina State College

Home economists of the U. S. Department of Agriculture advise taking a tip from the gas station boy who cleans your windshield, or from the man who cleans hotel windows. They have to know quick, easy methods of getting clear glass and is hard to rub dry. And they never use rags that shed lint either.  
Do you feel like a flat tire at 4 o'clock in the afternoon? Then, maybe what's wrong with you is your lunch. Perhaps you need vitamins--not the kind you get by buying pills, but the kind you derive from including raw fruits and vegetables in your lunch. The next time you have your lunch, be sure to include fresh fruit, maybe bright

yellow carrot sticks, a couple of stalks of celery, a tomato or a bit of cabbage. These would all fit well in a lunch pail, too. If you like sandwiches, try a combination that includes a fresh raw vegetable, a meat and chopped raw spinach special, or try raisins, cheese and carrot spread.

"Do your feet hurt?" asks the Consumer Guide. Seven out of 10 people, the Consumers' Guide reports, have foot trouble of some kind, usually due to poorly fitted shoes.

You can't get your right size just by asking the clerk for a certain size. Don't go by the size of your last shoes either, because there is no standard for shoe sizes. Don't guess your size. Have your feet measured each time you buy shoes, and keep on trying shoes until you get a really comfortable pair.

Never buy shoes that need alterations.

Allow one-half inch beyond the end of your big toe to the end of the shoe inside. The ball of the foot (the part between the great toe joint) should rest on the widest part of the sole. The shank of your shoe should fit snugly under your arch.

The shoe should hug your heel, with no gaping and no slipping when you walk. The fit should be firm at the bottom of the heel as well as at the top.

ording to law to satisfy said note.

NOW, THEREFORE, notice is hereby given that the undersigned J. C. Branch, Trustee will sell the lands described in said Deed of Trust at public auction for cash at the Courthouse in Halifax on Monday, the 28th day of December, 1942. The lands which will be sold as aforesaid are described in said Deed of Trust as follows:

## Rural People Ask 3 Questions About Meat

Dean I. O. Schaub of State College, director of the Agricultural Extension Service, says that neighborhood leaders who are explaining the Share-the-Meat program in rural areas, find that most farm people are more than willing to cooperate in the plan. Generally, three questions about the program are being asked by the voluntary neighborhood leaders, he said.

The first question is: "Do I have to buy or otherwise obtain a permit to kill my own hogs or other animals?"

The answer, says Dean Schaub, is an emphatic "NO!" The program is voluntary at the present time, and farm families can kill their own meat animals at will, and on the same basis as in previous years, but they will be expected to dispose of surplus meat above the 2 1-2 pounds quota per week for each adult member of the family.

The second question usually asked is: "Why do we have to cut down the amount of pork, beef, veal, lamb and mutton that we eat when farmers produced the most livestock in history?"

This can be answered, the Extension director said, by simply reporting that demands of the armed forces and other United Nations have risen to the extent that our soldiers, sailors and allies cannot have all the meat they need if civ-

ilians are to eat all they want. The third question is: "Why don't we ration meat as we do sugar?"  
The answer to that is not very complicated either, Dean Schaub stated. Rationing meat is not so simple a problem to work out as sugar rationing. It is not expected that meat rationing can be put into operation until the early part of 1943. In the meantime, we are asked by our Government to ration restricted meats voluntarily.

### State College Ans. Farm Questions

Question--What is a good recipe for making sausage?

Answer--North Carolina farm people have found the sausage recipe in Extension Folder No. 31, "Killing and Curing Meat on the Farm," to be good. For 50 pounds of pork (three fourths lean and one fourth fat) use one pound of fine table salt, 2 1-2 ounces of finely ground black pepper, and 3 ounces of sage. Mix these ingredients thoroughly and spread evenly over the meat. Then stir the meat well before chopping. A copy of the folder may be obtained free from the Agricultural Editor State College, Raleigh.

Question--How should cattle infested with grubs be treated?

★ IN THE ARMY ★  
they say:  
"YARD BIRD"  
for a recruit who is slow to learn  
"BLITZING BRASS"  
for polishing buttons  
"COW TRACKS"  
for non-commissioned officer's chevrons  
"CAMEL"  
for the Army man's favorite cigarette

FIRST IN THE SERVICE  
With men in the Army, Navy, Marines, and Coast Guard, the favorite cigarette is Camel. (Based on actual sales records in Post Exchanges and Canteens.)

# THOUSANDS OF ARMY VEHICLES USE SINCLAIR LUBRICANTS

In saving wear and avoiding breakdown the U. S. Army uses Sinclair lubricants in many "Jeeps", tanks and other vehicles. Your Sinclair Dealer has the same quality lubricants to reduce wear in your car.

To save engine wear he has Sinclair Opaline Motor Oil. Opaline stands up better and lasts longer because it is not only de-waxed but also de-jellied. Play safe, have your Sinclair Dealer drain and refill your crankcase with Opaline every 1,000 miles.

**OIL IS AMMUNITION - USE IT WISELY**
