WADE H. DICKENS,

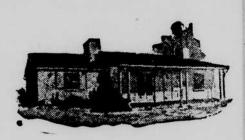

What kind of a house would you put here?

AFTER THE WAR, somebooks a going to put up a new house on that pretty rise of ground that overlooks the river bend just outside of the town line. Nothing elaborate. Just a pretty little house snuggled into the trees as though it belonged there.

Somebody else may buy the old Ward farm. There should be many a good day's hunting in those rolling fields and back through the woods over to the State road. Fixed up a little bit—and it shouldn't take much money—it would be a trable place for a man and his family.

Yes, somebody's going to buy it. Somebody's hways coming along, with a dream and a little

money, and doing the things we'd promised ourselves we'd do someday.

But this time, why can't that "somebody" be (i) you?

Look... Suppose you put 10 percent of your pay into War Bonds. At least 10 percent—more if you possibly can. And keep putting it away—putting it away—putting it away. Week after week—payday after payday. Here's what happens:

Before you know it, you get so you hardly miss that money. And if you do miss it, you've got something better to replace it—the knowledge that you, personally, are helping to insure a steady flow of planes and tanks and guns to the men who

fight. The knowledge that you, personally, have toed the mark and are helping to win the war.

Then, one of these days, when peace has come again, the money you've put away starts coming back to you. And bringing more money with it—you get four dollars for every three that you put in!

When that day comes, you can get out your pracil and start figuring just what kind of a house you'll put on the river bend.

But to be sure that day does come, you'd better do this: You'd better get out your pencil right now and start figuring how you can save at least 10 percent of every single pay check with U. S. War Bonds!

SAVE WITH U.S. WAR BONDS EVERYBODY...EVERY PAYDAY.

AT LEAST 10%
