

A WARNING TO PIG BOATS

CANADA, a nation with virtually no shipbuilding industry four years ago, celebrated the launching of her first home-built Tribal destroyer by sending 12 ships down the ways on the same day, a record in Canadian shipbuilding history. The multiple launching dramatizes the Dominion's newly-attained position as one of the world's most important ship-producing nations. In addition to the destroyer, vessels launched were two frigates, two freighters, an Algerine minesweeper, a corvette, a patrol boat, a tanker, and three large tugs. In Halifax, Mrs. Macdonald, wife of the Minister of Naval Services, sponsored the Micmac.

One of the most colorful ceremonies was held at United Shipyards in Montreal, where Commander Adelaide M. Sinclair, the new Director of the Women's Canadian Naval Service, christened the S.S. Fort Esperance, one of the two 10,000-ton merchantmen sent down the ways during the day. Taking part in the ceremony were a WREN guard of honor from the R.C.N. musical "Meet the Navy," the male sea chanty chorus from the same show, the Toronto R.C.N.V.R. band, and a detachment of fifty ratings. An outstanding economist, Commander Sinclair is a former president of the Kappa Alpha Theta society,

which has more than 27,000 members in the United States and Canada. Commander Sinclair is shown at top as she cut the ribbon which released the champagne bottle. At right below the destroyer Micmac is seen as it slides into the water.

State College Hints For Homemakers

Take care of the fallen leaves. No, don't burn them. Your soil needs them. Spade them into the soil so that they will break down into valuable organic material, called humus, for next spring's Victorious Victory Gardens. Your flowers will need just

what these leaves will do in soil improvement, too.

Save your leaves. Did you know that Irish potatoes stored in the light will turn green and taste bitter? That, they will spoil if frozen? Potatoes should be stored in a cool, dark place where the temperature does not rise above 60 degrees or fall below 40 degrees.

Garbage surveys show that the average American wastes 225 pounds of food a year. A good 6-week supply of wasted food is

like throwing victory into the garbage can.

A cleaner plate is a war-way to victory. A good way to use leftover mashed potatoes is in making soup. Add a small amount of water or milk to the potatoes and cook for a few minutes, stirring until the lumps are dissolved. Then, add a small onion and some diced celery leaves. When done add enough hot milk for the desired amount of soup. Garnish with chopped parsley or celery leaves, if desired.

Because this Christmas will be so different

IN MILLIONS OF AMERICAN HEARTS, there will be little joy this Christmas, and little spirit of holiday celebration.

But there will be, we believe, a deep realization of the spiritual meaning of the Christmas day. There will be a realization of how blessed it would be—once again—to have "Peace on Earth, Good Will Toward Men."

And there will be, in many hearts, a solemn resolve to punish those who have made a mockery of all the things that Christmas stands for . . . and so to bring back those things to a war-weary world.

As an expression of this kind of Christmas feeling, there are no finer or more meaningful gifts than War Bonds.

When you give War Bonds you are truly giving the "present with a future" . . . not only for the future of the one who receives your gift, but for the future of the world as well.

For, by buying and giving War Bonds you will bring Victory so much closer and help save the lives of clean, decent Americans . . . that more of them may come back to enjoy Christmas as Christmas should be.

Think about this when you're deciding what to give to those you hold most dear.

Think about it . . . and give War Bonds.
