ON BIGOTRY

BY RUTH TAYLOR

No American worthy of the name can indulge in bigotry. Bigotry is diametrically opposed to those principles upon which America was founded and through which it has grown to highest stature among the nations. Bigotry is a mushroom growth which strangles first the plant of one faith and then that of another. No religion is safe if bigotry in any form is allowed to flourish.

Race or religious prejudice is not inborn, but is learned. It is based on a pre-judgment or a conclusion made in the absence of facts to support it. It is the result of ignorance and beneath any right-thinking man or woman.

If we indulge in spreading false rumors, or generalize about any group; if we permit personal dislike for any individual to lead us into careless condemnation of the group from which he comes; particularly if we use thoughtless, danger-provoking characterizations before children; if we stir up or indulge in race or religious or class hatred, we are false to our country and to our own faith.

The views of Protestant, Jew and Catholic are alike in this. As witness:

The Protestant, Richard Hillary speaks: "Christianity means to me, on the social plane, man's humanity to man. Everything else I see as man's inhumanity to man."

The Jew, Sigmund Livingston speaks: "Tolerance of intolerance is the greatest weakness of American democracy, intolerance is in itself a negation of tolerance. Carried to its logical conclusion, every form of intolerance against any group or sect would destroy the very democracy which permits such intolerance."

The Catholic, Archbishop Francis J. Spellman, speaks: "The first

step which each one of us take to eliminate bigotry, selfishness, harshness, injustice and contempt is to make sure they have no place in our own. Malice toward none, justice to all is the general American formula and practice. No true American will nurture, promote, or incite any anti-Semitic, anti-Negro, anti-Catholic, anti-any group of fellow law-abiding American citizens.

Bigotry must not flourish here!

What Price Patriotism?

What do you think of strikes in arms plants now?

What do you think of workers in essential industries leaving their jobs now?

What do you think of evasion of war restrictions now?

I know what you're thinking - and those are my sentiments, too!

But - do you know that the fat salvage drive has slumped?

Somebody is getting careless. Somebody thinks the war is about over. Somebody isn't doing her share.

I hope it isn't me. I hope it isn't you.

The war isn't over yet - in Europe or in the Far East. Our men still need munitions and medicine.

And the one way all women can help is by saving - and turning in all waste fats.

When a woman takes her container of used cooking fat to a meat dealer, she is putting a vital raw material to work. Used fats are no longer waste. They are vital in industrial production of war materials and civilian necessities.

Whitley, daughter of Mr. and Mrs. N. B. Whitley won county honors in an individual demonstration of the preparation of ice cream. Miss Whitley also ranked high in the state contest.

Women who save and turn in fat make more tires available for trucks, jeeps and planes. They furnish a necessary ingredient for making rubber rafts and boats for flyers forced down at sea, and all the rubber fittings and supplies fighting men need. The fighting man's safety is protected in many ways by the products and by-products of fat.

STATE COLLEGE ANS. TIMELY FARM QUES.

QUESTION -- Can you give me any information on choline for proper animal and poultry nutrition, in addition to information on vitamins A and D?

ANSWER--Choline is of such recent prominence in nutrition research that we are not in a position to publish anything on this subject, says Dr. Walter J. Peterson, head of the Nutrition Section, Animal Industry Department, at State College. "We have a number of years of study on the cystine and methionine requirements of pigs and it seems likely that choline may well be a part of this picture," Peterson reports.

QUESTION -- What is the best temperature for curing sweet potatoes?

ANSWER--About 75 to 80 de-

grees is the best temperature for average conditions. Try for an even cure of all the potatoes. If the temperature is allowed to run up too high, the potatoes in the top tier of baskets will cure out much faster than those in the lower baskets and an uneven cure will result. Watch the baskets in the top tier and if the potatoes show any evidence of sprouting, the heat should be lowered. After the potatoes are cured, try to keep them at a temperature of about 55 degrees. Much lower temperatures than this may result in mold damage.

QUESTION -- Should I feed my beef calf while it is still nursing?

ANSWER--Yes, says Leland Case, Extension animal husbandman at State College, and he suggests two ways of doing this feeding. The calf may be allowed to run with the cow and get his grain from a creep. Another plan is to separate the cow and calf after about 6 to 8 weeks of nursing, and allow the calf to nurse twice a day. Feed can be kept before the calf while he is in his stall.

It saves a coat to unfasten it when sitting in it for any length of time. This lessens strain at both the hips and the shoulders and prevents stretching and sagging.

State College Hints Farm Homemakers

When stewing dried fruits, the addition of a small amount of lemon or orange juice and a bit of lemon or orange rind will improve the flavor.

To save time when hanging out clothes on cold days, pin all the handkerchiefs, socks and small pieces to wire clothes hangers before going outside to hang them. Arranged in this way, it takes only a moment to hook the hangers over the clothesline, thus saving time and fingers, both in hanging out the clothes and taking them in.

To keep potted plants from damaging paint or varnish on window sills, use any scrap piece of glass and have it cut to fit the window sills.

Stepped shelves do away with stacking. Sliding shelves bring equipment to the user.

In seating oneself or rising from the table, do so from the left of your chair. Pull chair out with right hand, step forward, seat

self and pull chair in place. Sit erect at table with feet flat or comfortably crossed on the floor. Keep arms and elbows on the table.

Remove napkin from table, fold, and place in lap to protect clothes and to wipe hands.

"Farmers cannot afford to go in and out of the livestock business every time the wind changes," says Leland Case, Extension animal husbandman at State College.

Pork production at federally inspected plants was 168 million pounds for the first week in November, or 42 million pounds less than a year ago.

FEEL PEPPY! RELIEVE THAT ANKLE BACKACHE
DUE TO FATIGUE AND STRESS
Feel like stepping on again by rubbing the backache (due to fatigue and stress). Just rub on some EN-AR-CO and instantly it begins its four-fold work of helping soothe that back. Pleasant. 60c and \$1.00 per tin. Caution: Use only as directed. National Remedy Co., N. Y. C.

Fresh up
...FOR YOUR BIG OCCASIONS!

You'll enjoy your big occasions more, if you're feeling peppy and happy. So start with a "fresh up" and start with a smile.

The fresh, clean taste of 7-Up will freshen your spirits. You'll like every sip of this sparkling, lively drink.

"Fresh up" at any store displaying the 7-Up signs.
