

SMITHFIELD

HIGH TIMES

This topic is of great importance to our school as well as to you, the students. It seems that a few students have taken it into their heads to show off and disturb our lessons. These students should be thankful that they are being not only punished but also that the school (of which they are so proud), and their teachers are still standing at the same time. The student body should be thankful that the school will prove to be a better school than that of any other school. We ask them to be thankful for the things done each day.

How different is the class with thankful hearts! How fortunate to be born with an outlook on the bright side of life! And, what a victory of spirit through a road of more comfort and happiness. Many of our students are they who are thankful for our requests for help. Our fortunes will be the thankful heart on this Thanksgiving. At least, it should be a great one.
