RECYCLING WORDS

We're excited to bring a new puzzle to our readers called "Recycling Words". This puzzle begins with a 5 x 5 grid, and the goal is to fill each spot in the grid with a letter so that 5-letter English words are formed in all 5 rows (side to side), as well as all 5 columns (up and down). The words can read left-to-right or right-to-left in the rows, as well as top-to-bottom or bottom-to-top in the columns. We'll start each puzzle with one of the rows or columns already filled in, like in this example →

			B	
			R	
			A	
			V	
			O	

One solution to this puzzle would be the following 5 x 5 grid:

B	O	M	B	S
O	V	A	R	B
M	A	D	A	M
B	R	A	V	O
S	B	M	O	B

This week's puzzle is pictured below. In two weeks we'll print the solution and publish the names of all who call in the correct answers. Good luck, and Enjoy!

Our thanks to Laural A. Whipkey.

M	O	L	A	R
