Post Cards Now Pre-Cancelled Don't Depend on Postmark

NAME THAT CITY! — The pre-cancelled postal cards now sold by the Post Office have a built-in hazard for users. Often the local post offices do not bother to put cards through the dating-postmarking machine, and if the user hasn't shown his full address, the receiver has to guess about the city and state from which a card comes. So, when using the new cards, don't depend on a postmark to help identify yourself.

Chevelle Malibu Sport Coupe

No matter how you look at it, this car makes a lot of sense.

If you're interested in value (and who isn't), the eleven features above give you a good idea why more intermediate-size car buyers are thinking Chevelle.

If you're looking for a wide power choice, Chevelle starts out with a standard 120-hp Six, an ideal city performer. After that you may order from a variety of engines that turn it into an even greater highway performer.

Room? Large door openings. Wide

curved side windows for extra shoulder room. Great front and rear leg room. Those four, five or six passengers have it made. And so do you. Chevelle may seat like a big car but it handles like a smaller car.

Comfort? Thick wall-to-wall carpeting in Malibu models. Foam-cushioned seats. Easy-to-read instrument panel. The whole interior looks like those in cars costing far more.

Come on down to our showroom and take a drive soon. Chevelle begins to make even more sense after you've gone a couple of miles.

Are You As Penny Conscious As Mary?

To a little girl like Mary a few pennies may seem to be a lot of money. In her world a penny will buy things she wants. Things such as a piece of candy or gum or a balloon.

Mary is penny-conscious. Even so, she may not realize that a penny spent for electricity now will buy more than half again as much electric service as a penny did 25 years ago when her Mom was a little girl. Or that in Carolina she gets more electricity for a penny than most people who live other places in the United States.

The average price which CP&L customers pay for electricity they use in their homes is about 22 percent below the national average.

How has CP&L been able to keep the price of electricity coming down while most other things have been going up? By installing larger, more efficient generating plants; by adopting improved methods of transmitting and distributing electricity; and by working hard to introduce every reasonable economy, so that your penny will buy more.
