Pool - One of Our Biggest Assets

By Jean Bond McCamy
The Wake Forest Swimming Pool is one of the town's biggest assets. Visitors and newcomers are always surprised and delighted at the size of it, and amazed at the low admission price. True, there are complaints about the short hours, but everyone agrees that the morning swimming classes must take precedence over public swimming. It's the evening hours that cause the complaints. There's plenty of daylight time after work to have a good swim, but the pool closes too early to make it worthwhile.

But, even if the pool were open 24 hours a day, the major problem would remain. It's been a should we? problem for at least twenty years already. When I was a little girl, I spent so much time in the pool that I saw the last six weeks of summer through a haze. The chlorine was so strong by the middle of the season that thirty minutes was enough to turn eyes red and cloud the vision. Children are still coming home complaining about their eyes burning and everything looking funny. Why? Other pools don't have this problem; why

seems likely that more would be willing to pay more for the privilege of swimming in a cleaner, better pool. If season's tickets would give a guarantee for maintenance, and if single admissions could be made without making it prohibitively expensive for regular users.

Let's do something to our asset!
