The Old Yellow Almanes."

When Rila Wheeler Wilcer wrote the soem, this a tiets, she touched a chord that vibrated in thousands of hearts. For Ayer's Alman c, "The Old Yellow Almane' of the point, in thousands of hearts. For Ayer's Alman c, "The Old Yellow Almane' of the point, is intimately associated with the days at deeds of a large part of the world's population. How large a part of the world's population, How large a part of the population has general statement may include can be gathered from the fact that the yearly issue of Ayer's Almana is from 17,000, 00 to 25,000,000 copies. It is printed in twenty-eight editions and in some olgates a languages, including, besides English—Spanish, Portuguese, Dutch, German, Swedish, Danish, Norwegian, Bobenjan, Welch, Italian, French, etc. The old style aman c is looked upon by many as a relie of ant quity, especially the "patent medicine a manac," whose jokes are the but often of the very papers in whose columns they first a papeared. But there are almanacs and almanacs. Ever since Dr. Ayer's Alman so has been put out it has employed as hig a class of mathematical and astronomic il taient as is available in the country. The r suit is that it stands on a par, in respec of the reliability of its data and the accuracy of its calculations with the U. S. Nautic al almanac, and testimony to this fact is lound year after year in the letters, referred to the almanan depuriment of the comps py, from students and mathematicians in var ous parts of the world. In its persuance ce and reliability of its data male stands as a very fitting type of the Ayer Reme ica—Indispensible in the family and reliab a every day in the year. The 1897 edition of this useful almanac is now in course of distribution through the druggists of the sountry.

Wa shington Irving has often been ac-cused of saying that little dogs and

child en were influential members of

Fren h society. It is quite true that in

the I nited States I never noticed that

close and sentimental intimacy be-

so frequently seen in France. Ameri-

can life is so active, so desperately

crow led, either usefully or socially,

that perhaps it does not permit the loss

of tine inevitably brought about by

frien ily intercourse with a dog. As

for e tildren, I believe that their impor-
