

TOURISTS LINE AT SALISBURY

Will Stop Here for Supplies... Charlotte and Winston-Salem... Night Controls... The Glidden... The tour will stop at your city for luncheon and supplies on October 15th.

The party will consist of about 80 cars with an aggregate of from 250 to 300 people... Will you be good enough to advise us if you are prepared to supply our party with gasoline and water when they stop in your city on that day?

The best way to handle the gasoline supply is to have a tank wagon available at the point at which the cars will be parked with 40 or 50 five-gallon cans which can be refilled as often as necessary to serve gasoline to each of the cars in the tour.

A sufficient supply of lubricating oil in gallon cans should also be provided... Owing to the large number of cars in the party, it is essential that facilities be provided to serve them with as little delay as possible and we would ask you to inform us at once if you can be prepared to furnish such facilities.

Bridge Between Rowan and Davie.

The story told in the following clipping from the Salisbury Post of Wednesday will be good news to many readers of The Dispatch:

The question of building a bridge over South River was settled in the Davie county court at Mocksville yesterday in a mandamus suit to force Rowan and Davie counties to build the bridge. Rowan has been ready and waiting to build the bridge for some time but the suit was brought against both counties to get the matter properly in court.

Attorneys L. H. Clement and Hayden Clement, representing the state in advocating the building of the bridge in the Mocksville court yesterday, returning home last night, Hayden Clement made a strong speech in behalf of the enterprise and was sustained by Judge R. A. Daniels. The bridge will now be built at an early day. It is to be an iron structure to cost \$7,000 and to be paid for by the counties of Rowan and Davie, each county to pay its pro rata according to its poll tax.

Prominent Junior Order Man Dead.

William E. Patson, prominent in secret order circles and most highly esteemed by all who knew him, was found dead in his room in the Shapers' building in Raleigh Wednesday afternoon. He had been in failing health for a long while but his friends felt for some weeks that he was recovering. He had suffered for a long while with obesity and infarction of heart action and this caused death. He was past national counselor, Junior Order United American Mechanics, the highest office in the gift of this great order. For a number of years he has been editor of the American, the national organ of the Junior Order. Also he was past master of Raleigh Lodge of Masons in addition to being an honored Odd Fellow and Knight of Pythias and a Knight Templar in Masonry. He is a native of Raleigh and was deputy commissioner of labor and printing under R. B. Lacy and later under H. B. Varner.

Bearing out the contention of quite a number of people that the recall movement started some time ago in Wilmington, ostensibly because of dissatisfaction over the sanitary closet, was not dead, but sleepeth, was a meeting Monday night of the steering committee of this movement in the office of the leader, K. C. Sidbury, Esq.

It was decided to hold another mass meeting on October 25 in the court house, at which time it will be definitely determined as to when the recall petition is to be presented to the council. Arrangements will also be made at this meeting for financing a campaign against the present administration. Mr. Sidbury says that over 1,300 names have been secured to the petition and it is claimed that only slightly more than 900 are required, so the leaders of the movement claim they have 400 more than are needed.

SCALP AND HAIR TROUBLE GENERALLY CAUSED BY CARELESSNESS.

Dandruff is a contagious disease caused by a microbe which also produces baldness. Never use a comb or brush belonging to some one else. No matter how cleanly the owner may be these articles may be infected with microbes, which will infect your scalp. It is far easier to catch hair microbes than it is to get rid of them. A single stroke of an infected comb or brush may well lead to baldness. Never try on anybody else's hat. Many a hat-band is a resting place for microbes.

If you happen to be troubled with dandruff, itching scalp, falling hair or baldness, we have a remedy which we believe will completely relieve these troubles. We are so sure of this that we offer it to you with the understanding that it will cost you nothing for the trial if it does not produce the results we claim. This remedy is called 'REXALL' '33' Hair Tonic. We honestly believe it to be the most scientific remedy for scalp and hair troubles, and we know of nothing else that equals it for effectiveness, because of the results it has produced in thousands of cases.

'REXALL' '33' Hair Tonic is derived to banish dandruff, restore natural color when its loss has been brought about by disease, and make the hair naturally silky, soft and glossy. It does this because it stimulates the hair follicles, destroys the germ matter and brings about a free, healthy circulation of blood, which nourishes the hair roots, causing them to tighten and grow new hair. We want everybody who has any trouble with hair or scalp to know that we think that 'REXALL' '33' Hair Tonic is the best tonic and restorative in existence, and no one should scoff at or doubt this statement until they have put our claims to a fair test, with the understanding that they pay us nothing for the remedy if it does not give full and complete satisfaction in every particular. Two sizes, 50 cents and \$1.00. Remember, you can obtain 'REXALL' Remedies in Lexington only at our store—The Lexington Drug Co., Lexington, N. C.

Invention by Lenoir Man.

We see from a Pittsburg paper that Mr. James S. Spalnhour, a native of Lenoir, has invented, or rather built, a flying machine and recently made a daring flight in it himself, going to the height of 1,000 feet. Mr. Spalnhour's machine is a biplane and the feature he has invented and patented is a device for rendering flying machines steady and stable in flight. The device worked perfectly in the instance of his high flying and, while it was not witnessed by a large number of persons, those who did see it were enthusiastic over the event. Mr. Spalnhour has a number of men associated with him in the manufacture of his invention and will, possibly, make much money out of it—Lenoir News.

A BAD ROAD. WAGON IN MUD—DEAD HORSE.

The republican national committee has been called to meet in Washington December 12, to fix the time and place for the next national convention of that party.

Children Cry FOR FLETCHER'S CASTORIA

Obadiah Gardner, the new senator for Maine, is a practical farmer.

Cures baby's croup, Willie's daily cuts and bruises, mamma's sore throat, grandma's lameness—Dr. Thomas' Electric Oil—the great household remedy.

Round-roob Fountain Being Rapidly Rebuilt.

Passengers traveling over the Western North Carolina railroad are surprised to see how rapidly the work of rebuilding the famous Round Knob fountain, which is to sport water 250 feet high, is going forward. At a number of points along the road road loads of piping have been unloaded to be used in conducting the water from the streams far up the sides of the big blue hills to the fountain. In the valley several hundred yards from the point where the old fountain stood, the new fountain has been located and the work of digging out the base and a gun for the piping has already been commenced. At the bottom of the big hill across the valley from the fountain a new platform has been built and a lot of lumber placed.

Near the top of the mountain at the head waters work is also being done. There is every indication that before the people know it the fountain will be playing and glittering in the golden light of the mountains, painting beautiful rainbows in the ethereal blue, as the gentleephyra roll down from the crests of the exulting hills.

The fountain will be like a beautiful diamond encircled with a cluster of pearls, and will be a monument to Mr. J. M. Maupin, president of the Round Knob Company, now developing this fine property—Salisbury Post.

During President Taft's stay in New York Wednesday, Gov. Aldrich is reported to have been in the city.

During President Taft's stay in New York Wednesday, Gov. Aldrich is reported to have been in the city.

STRENGTH GUARANTEED.

It is putting their hands on Miles Parlow, a notorious negro of this section, wanted in connection with an attempt to wreck of passenger train No. 10 on a Carolina & Northwestern railway near here ten days ago. It is believed that they will have a criminal of the worst type and one who has other offenses to his credit. Circumstances have come to light today which point strongly to Parlow as the one who made an unsuccessful attempt to wreck a passenger train, on which there were two or three of his own children, his purpose possibly being to retire from their death insurance on their lives and also get damages from the railroad. That his plans were foiled was the latest accident, amounting almost to a miracle. The train, with its hundred or more passengers, was not plunged 50 feet or more into Crowder's creek, was due to a miscalculation on Parlow's part. When the train struck the trestle it was running at a speed of about 25 miles an hour. The trestle, in a curve and at the speed the train had the preponderance of its weight was on the side of the track opposite to the one on which the would-be wrecker loomed a rail. One of the railroad officials is responsible for the statement that had the train been running at a rate of 10 or 15 miles an hour instead of 25 the train's weight would have been on the other side of the track and the engine and cars would undoubtedly have plunged to destruction.—Gastonia Gazette.

After exposure, and when you feel a cold coming on, take Foley's Honey and Cat Compound. It checks and relieves. Use as a substitute. The genuine is in a yellow package always. Sold by J. B. Smith.

In Newton and Hickory townships, Catawba county, campaigns have been started for bond issues of \$50,000 for each township for the building of good roads. There is also a petition before the county commissioners asking for the establishment of a county chain gang.

You are not experimenting on yourself when you take Chamberlain's Cough Remedy for a cold as that preparation has won its great reputation and extensive sale by its remarkable cures of colds, and can always be depended upon. It is equally valuable for adults and children and may be given to young children with implicit confidence as it contains no harmful drug. Sold by all dealers.

The Cemeteries Committee of the Richmond City Council gave permission to the family to bury Henry Clay Beattie, Jr., in Mt. Airy cemetery if he is electrocuted for wife murder. The family of the condemned wife murderer has relinquished all hopes of saving his life and is expecting the court of appeals to confirm the sentence of the lower court.

A conference of progressive republicans has been called to meet in Chicago, on October 16, for the purpose of gauging the extent of the movement and the future conduct of the work of the organization.
