

TWO OTHER TOWNSHIPS ARE MAKING PROGRESS

Continued From Page Five what it is now declared to be—the model county from a sanitary standpoint in the entire South. It is disappointing, however, to be compelled to report to you that three or four well known white property owners persist in interfering with the completion of this very important work.

"We have instituted and are carrying forward a series of laboratory experiments for the purpose of establishing a scientific basis for the control of local market conditions. These experiments consist of the exposure of culture plates in the buildings occupied for the sale of fresh meats and taking swab specimens from the cut surfaces of meats which are displayed for sale outside the refrigerators in these places of business. Our results so far have been surprisingly successful in proving our contention that the present city market is an unfit place in which to sell meats. Our culture plates disclose the fact that meats exposed for sale in the city market contaminate from 10 to 15 times more often on their surfaces than meats sold in privately owned markets which are properly cared for. We shall continue these experiments and extend them to other lines of local business as rapidly as possible, in this way we hope to establish a basis upon which to govern the issuance of permits by the Board of Health, to those who desire to engage in the sale and distribution of foods in the city and county.

Vital Statistics for Month. The report on the vital statistics for February showed a lower temporary death rate per thousand than for some months. The total death rate was 15.6; the white death rate was 14.4, and the colored rate 17.1. The temporary birth rate per thousand was: White 26.7; black, 30.8; total, 28.5.

Dr. John Thames, assistant county health officer, reported 42 visits to indigent sick in the city and four in the county; 39 patients treated as indigent and 66 treated in clinic; 49 permits issued to the James Walker Memorial Hospital, 49 from the city and nine from the county; three cases of typhoid occurred during the month, all in the city. Two cases of diphtheria remained in quarantine at the end of the month; two cases were endorsed by the health department. In the county, outside of the city, 18 cases of whooping cough remained in quarantine at the end of the month. During the month the department made 35 inspections. The regular visits to the county institutions were reported, conditions found to be good. Fourteen visits were made to schools for inspections; eight talks made to school children; one community meeting; 12 children excluded not quarantined and 18 school children vaccinated. Dr. Thames reported that in almost every instance the buildings placed over the septic tanks at the rural school houses were constructed by untrained workmen, and that the buildings are not fly-proof.

The Water Supply. Mr. George Catterall, director of laboratory work, submitted the following report:

"Following is my report for the month of February, 1915: 'The results of tests on the city water during the month have been excellent. The bacteria counts have been consistently low, and there has been no evidence of colon bacilli during the entire month. 'I desire particularly to call attention to the very white and generally satisfactory appearance of the water during the latter part of the month, and at present. The reason for this is of interest. 'It will be recalled that the City Council was given in the summer of 1913, a list of necessary things to be done at the water plant in order to give the proper treatment to the water. These recommendations were endorsed by the city engineer and yourself and afterwards by Prof. Phelps. A part of these, as well as some other needs that the increased requirements since then demanded, have now been completed. The consequence was that in the following spring the increased consumption made the plant facilities more inadequate than formerly, and from that time it has not been possible to give the water the proper treatment. Recently, through the efforts of Mr. Loughlin, the consumption has been out from one-half to three-fourths million gallons, and we have been able to resume a more suitable treatment of the water, with the results to which I have called attention. 'Numbers of citizens complain of the bad appearance of the water furnished them and refrain from its use on their account. This is, of course, objectionable from a sanitary standpoint, as they are driven to promiscuous well waters. I feel, therefore, that too much emphasis cannot be laid upon the fact that the objectionable features of the water could easily be removed if the City Council would furnish the means. 'I have examined in the laboratory the regular weekly samples of milk submitted by the milk and meat inspector and reported results to him. These amounted to 55 samples. 'In addition to the samples handled in the laboratory the following: Well waters, nine samples; urines, three samples; throat swabs for diphtheria, five samples; human milks, three samples; blood for E. typhi, three samples;

bloods for Widal test, three samples." The report of Dr. T. H. Carroll, meat and milk inspector, was as follows: "I made 23 inspections of dairies and dairy farms; the sanitary conditions, health of cattle and attendants were good. The bacterial counts and butter fat tests of our milk supply are as follows:

Table with 2 columns: Name, Bacterial Counts, Fats Counts. Includes entries for A. O. McEachern, L. L. Newell, Chas. Rogers, etc.

Chief Eben Finer, of the Sanitary Police corps, reported 14,418 inspections, 2,638 condemnations, 2,833 services reported and 52 complaints received.

HOLDS ANNUAL MEETING.

Southport Commercial Association Elects Officers for Year. (Special Star Correspondence.) Southport, N. C., March 9.—The regular annual meeting of the Southport Commercial Association was held last night, at which reports of the past year were made and the election of officers for the ensuing year took place.

WALKER TO BE PLACED ON TRIAL AT SOUTHPORT SOON. To be Tried at Term of Court Which Convenes Monday Next. (Special Star Correspondence.) Southport, N. C., March 9.—Great interest is being taken here and in the county, on the matter of the Brunswick county Superior court, which convenes next week, in a "mixed" term, the particular interest being in the case of Walker, who killed Jackson Stanland. A great crowd is expected here during the court.

REPORT OF THE CONDITION OF

Murchison National Bank

WILMINGTON, N. C., AT THE CLOSE OF BUSINESS, MARCH 4TH, 1915.

Financial statement table for Murchison National Bank. Includes sections for RESOURCES (Loans and Discounts, Overdrafts, U. S. bonds, etc.) and LIABILITIES (Capital stock, Surplus fund, etc.).

CALOMEL IS MERCURY IT SICKENS! ACTS ON LIVER LIKE DYNAMITE

"Dodson's Liver Tone" Starts Your Liver Better Than Calomel and Doesn't Salivate or Make You Sick.

Listen to me! Take no more sickening, salivating calomel when bilious or constipated. Don't lose a day's work! Calomel is mercury or quicksilver which causes necrosis of the bones. Calomel, when it comes into contact with your bile and constipated waste...

Here's my guarantee—Go to any drug store and get a 50 cent bottle of Dodson's Liver Tone. Take a spoonful to night and if it doesn't straighten you right up and make you feel fine and vigorous by morning I want you to go back to the store and get your money. Dodson's Liver Tone is destroying the sale of calomel because it is real liver medicine; entirely vegetable, therefore it can not salivate or make you sick.

capture of Walker, Mr. D. G. Hewitt, brother-in-law of Stanland, has paid \$200 and ex-sheriff J. J. Knox \$100, these being amounts offered by them individually for the capture of Walker. It is expected that the county reward of \$400 will be paid when the commissioners hold their meeting.

NEWBERN CLEANING UP TOO

Subjects to be One of Cleanest in State on March 25th. (Special Star Correspondence.) New Bern, N. C., March 9.—Newbern is going to be one of the cleanest cities in the State. There is to be no trash left in any of the back or front yards and in fact all refuse matter will be conscientiously by the City Beautification Club as 'Clean Up Day' and already the citizens are taking a great interest in the event and have assured the club that they may rely on their support in making a success of the movement.

Table with 2 columns: Description, Amount. Includes items like Stocks and Discounts, Loans and Discounts, Bank Deposits, etc.
