Should the war continue on its present scale, it is estimated that the total number of nurses required in the military hospitals here and abroad by next July will be 50,000. These estimates, the report states, are based on and army of 3,000,000 and a navy of 350,000, or approximately one nurse to each 74 of the military and naval population.

To meet the nursing requirements of the coming year a campaign will soon be inaugurated in which each state will receive an allotment, a duplication of the plan by which thousands of nurses were enrolled during the past summer. The department of nursing of the Red Cross is the reserve for the army and navy nurse corps.

The Red Cross has spent about \$850,000 in equipping nurses assigned to duty abroad. Approximately \$1,500,-000 of an appropriation of \$1,719,357 has been expended in equipping base hospital units. The organization has equipped 50 of these units and assisted the army nurse corps in organizing two others for the army since our entrance into the war.

For the navy it has organized or is base hospital and seventeen naval station hospital units. Each base hospital unit has 500 beds and 60 nurses. Origregular health work in this country.
