

### Oily skins—How to correct them

**F**IRST cleanse your skin thoroughly by washing it in your usual way with Woodbury's Facial Soap and warm water. Wipe off the surplus moisture, but leave the skin slightly damp.

Now work up with warm water a heavy lather of Woodbury's Facial Soap in your hands. Apply it to your face and rub it into the pores thoroughly—always with an upward and outward motion. Rinse with

warm water, then with cold—the colder the better. If possible, rub your face for a few minutes with a piece of ice.

This treatment will make your skin fresher and clearer the first time you use it. Make it a nightly habit, and before long you will see a marked improvement—a promise of that lovelier complexion which the steady use of Woodbury's always brings!

### Enlarged pores

*How to make your skin fine in texture*

Dip your washcloth in very warm water and hold it to your face. Now take a cake of Woodbury's Facial Soap, dip it in water and rub *the cake itself* over your skin. Leave the slight coating of soap on for a few minutes until the skin feels drawn and dry. Then dampen the skin and rub the soap in gently with an upward and outward motion. Rinse the face thoroughly, first in tepid water, then in cold. Whenever possible, rub the face with a *piece of ice*. Always dry carefully.

Use this treatment persistently. You can feel the difference the very first time you use it. Within ten days your skin will show a marked improvement—a promise of that greater smoothness and finer texture that the steady use of Woodbury's always brings.

### Conspicuous nose pores

*How to reduce them*

Dip a cloth in very hot water; lather it with Woodbury's Facial Soap, then hold it to your face. When heat has expanded the pores, rub in very gently a fresh lather of Woodbury's. Repeat this hot water and lather application several times, *stopping at once if your nose feels sensitive*. Finish by rubbing the nose for thirty seconds with a lump of ice. Always dry your skin carefully.

This treatment cleanses the pores and strengthens the small muscular fibers so they can contract properly.
