IT IS SUNDAY MORNING

MERELY HUMAN?

the pillar and ground of the

More than ever before, men are

thinking of the church as a human

institution. They are judging it

by the practical, secular standards

employed in the appraisal of other

social agencies and indeed of in-

dustrial organizations. And some

of them conclude that the church

does not produce more bread, it

does not furnish work for the la-

boring man, and it does not in-

crease his wage, and the more es-

pecially since it is dominated by

the wealthy and the socially se-

cure, it does not justify its exist-

ence; it is, they say, a needless

expense and a bulwark of privi-

Perhaps if you apply their stan-

dards of measurement, their con-

church is only a human institu-

tion, and if there is nothing to

think of but bread and play and

physical comfort, if man is noth-

ing but an animated clod and soul and spirit are vain fictions, if re-

ligion is foolishness, then their

But if there is a God, if there is

a soul in man; if there is a des-

tiny to be fulfilled, or else defeat-

ed; if there is something more

than the merely human, then the

church may have a place; and the

people who believe in the church

may not be fools, and notwith-

standing all its faults, the church

may be worth while in such a

Factory Markets For Farmers.

Carrying on long-winded campaigns corn products. They have combined with the expectation of helping the to handle their various products to grow in the absence of a market. necessity for a substitute agriculture to take the place of cotton, nobody has yet been able to show the farmers a substitute that they can depend upon. Until we put up factories for the consumption of raw materials other than cotton, we needn't expect any other farm industry of a practical kind. Canneries and creameries can be combined in the south and be made the basis of prosperity for farmers, but manufacture in North Carolina at our anti-weevil campaigns never stress anything so practical as that.

Some of the counties in South Carolina have gone into both the cannery and creamery industries. They have succeeded around Florence and Sumter, and now neighboring counties are following suit. Manning is to have a cannery industry, and it moves the Charleston News and Courier to say:

The cannery movement took a.

try also could be utilized for a great manufacturing industry but we are slow about seeing our opportunity in it.

Factory Products.

One of the features of recent reports of the department of commerce is the increasing exports of American corn to European countries, but while the statistics refer to the shipment of grain in bulk, the probability is that the factory products of corn shipped abroad will soon exceed in value our exports of grain, Few consider that

of "corn products."

The American Corn Products association of New York has filed papers with the federal trade commission at Washington, under the Webb-Pomerene export trade act, for the purpose

of exporting corn syrup, corn sugar,

the American Maize Products company, of New York; the Clinton Corn Syrup Refining company, of Clinton, Iowa; the Huron Milling company, of

the A. E. Staley Manufacturing company, of Decatur, Ill., and the Keever Starch company, of Columbus, Ohio. Those are all immense concerns and they have hundreds of millions of dol-

lars invested in the manufacture of

farmers is not in it with industrial through one export corporation whose plants which furnish producers with business will be to do the export busia market for classes of products which ness and to educate Europe on the they can grow but can not undertake uses of the commercial products made from American corn. Either one or During all these years of talk about all of those companies have educated the coming of the boll weevil and the the south to the uses of their products. There is not a home in North Carolina that is not using corn products in one form or other.

Utilizing corn for the manufacture of so many salable and indispensable products is not merely a matter of general interest. It ought to keep us in mind of the industrial possibilities in the farm products we grow here in eastern North Carolina. We could least \$50,000,000 worth of the factory products we buy annually from abroad.

Cotton and Corn Belts Have Prospered.

The economists who have figured on ing down of business is not yet so pro- the west and north are the St. Cath-

Altogether he sees by Dog and other mines skirt the town to cotton has increased the purchasing permanency in the recent forward the east, and gold-bearing veins un-power of southern farmers as a whole, movement in and industrial activity of the right men with the process that

"Souls! Souls!" It is so easy to forget that a man is a soul, and that the soul needs care.

And that is the business of the church of the Living God. Not that it can forget the ordinary needs of men, or be indifferent to transient and physical circumstances. But the business of the church of God'is to cry in every quarter and in every tongue and through every relationship of human life, "Souls, souls, souls!" When the church compromises or fails to make that message clear, then it fails; when it does effectively remind men of this truth, that is success.

For the church is not merely made up of men and women. There is a reality back of the church and in the church, which is not just of time and circumstance. There is something eternal, something spiritual, something divine about the church. In Paul's phrase, it is the church of the Living God.

And that church of God rings out to every man its challenge of the enterprise of eternity, and dares him with it. It commands him to come up to the help of the Lord against the mighty gods of matter and greed and lust and pride and blindness and sin. It cries out to him to save his own soul, and the souls of all those who shall hear his voice or see his face.

Still, and forever, for all who have needs and hearts, who have sorrows and souls, who require courage or can bring strength to the armies of right-to all men and women and little children whatever, the church is the messenger of God, passionately pointing them to the Man of Galilee and Calvary, and crying, "In Him is our peace.'

Permanent Business Conditions. In other words, it is the expectation

South Carolina, but it seems to be growing at last. Last year the Sumter cannery proved a life saver to many farmers in that county. This year, it is announced, a cannery will be operated in Manning, 20 miles from Sumter. The Manning Times prints a list of prices which the cannery will pay for vegetables. It will, of course, buy for cash and farmers can know now, before they plant, what they expect to receive for their can products.

Canneries are a great help in many ways and this stabilizing of prices is one of the most important benefits which they assist in effecting. So long as the market for fresh vegetables or fruit holds well, making it profitable to ship, the grower can dispose of his output in this way. When the market for fresh vegetables falls off the cannery is there ready to take them and the grower is advised months in advance as to what he will get for them from the can-

nery. Why more canneries are not opened in the coast country around Charleston continues to be a mystery. Here, if anywhere, it would seem, it should be possible to make them profitable. They could certainly be made to prove of great Padvantage to this section and if the proper foundations for such a development were laid they ought to be money-makers for those who run them. If there is any industry which would seem to belong here in the very nature of things we should think that this was it. The reorganized chamber of commerce could not do better than give its attention to seeing if something can not be done on this line on a considerable scale.

points out that if the cotton belt can Chambers of commerce could not do make a good crop next year and demand remains at its present level this any better work than to encourage and promote the kinds of industries will prove of great help to the marwhich require raw materials for con- kets for grain and wheat, owing to the version into commercial products. increased purchasing power of the Even-if an industry is a small affair southern states. W. O. Scroggs, in his market article in the New York, Evening Post takes an optimistic and logical interpretation of the latest crop statistics sent out from Washington. The department of agriculture estimates the purchasing power of farm products for January at 68, on the basis of 100 for the year 1913. The figure is the same as for December, 1922. Of ten. leading farm products whose purchasing power is computed in terms of other commodities four have an index above the trade. 1913 level and six have one below it. Cotton and wool, with indexes of 134 and 135, respectively, are the two commodities having the highest purchasing power. The other two whose purchasing power is above the pre-war level, are eggs (112) and butter (110). Those which stand lowest in the group are beef cattle (60), potatoes (65), swine (67), and corn (76). It is evident that the producers of fibers are more prosperous than the producers zation of American contractors has now it is proposed to go thoroughly of foodstuffs, and it is the low prices of the latter that bring average pur-

since their youth, to continue their trade, but newcomers are barred.

The police still tolerate the beg-gars' colony in "Passage Saint Ange," near the northwest wall of the city. because they much prefer to have these people who know what is going on in the underworld where they can lay hands on them when they are wanted. It has been found by the police that many beggars after the war learned a trade or capitalized their persuasive powers or their ability to size up "easy powers or their ability to size up "easy marks" by getting into the selling end road. She was remarkably active in of various businesses.

King Louis XVI has taken much of the joy out of the life of the butcher was always cheerful and bright, and of today, for the court of appeals has ound an absolete decree in a dusty, forgotten volume which requires the butcher to give a year's notice of his intention to close his shop on pain of a penalty of 500 francs "or a heavier penalty." This decree of February 17,

1776, the court of appeals has decided, disposed of the question not only for that time, but for the indefinite future."

A Bordeaux butcher, just sentenced under this old law, had won his case in two lower courts where he had been prosecuted for refusing to sell meat at prices fixed by the authorities and for closing his shop.

A theatre for presenting standard French comedies is being constructed on board the steamer Lutetia, which will sail from Bordeaux March 17 for Buenos Aires. The passengers on the voyage to South America will have all the usual diversions of the shore, for besides plays there will be motion pictures, a "Punch and Judy" show for children, and dances and all other social amusements. A stock company permanently engaged for the steamer comprises four men and two women. Another innovation on ' the steamer will be a salesroom installed by a Paris department store where anything not in stock may be ordered for shipment later from Paris.

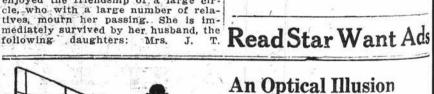

Vells, which came back some time ago as a sort of softening decoration around the edge of women's hats and lately began to stream slightly in the breeze to the rear, as they did many years ago, now are creeping down a few inches below the front edge of some o hats so as to mask shy eyes. the fashion leaders suggest that wells soon may be worn to cover the face entirely, as was the custom a generation back, when a well dressed woman would as soon have thought of going in the street barefooted as barfaced.

Dies at the Age of 80
