RFC SPENDS 13 BILLION ON WAR

Ranges From Purchase Of Cuban Sugar, Newfoundland R. R. Rehabilitation

CHICAGO, Apr. 30.—(AP)—Jesse Jones made an accounting today of more than 13 billion dollars he said the Reconstruction Finance Corporation and its subsidiaries had spent in the last two years in behalf of the war effort.

It ranged from purchase of the entire Cuban sugar crop to rehabilitation of a Newfoundland railroad.

Speaking before the 30th annual meeting of the Chamber of Commerce of the United States, Jones, secretary of Commerce as well as director of the RFC, said some of the outstanding items which went to make up the 13 billion were \$1,912,000,000 to build aircraft plants, \$360,000,000 for magnesium manufacture synthetic rubber, and \$182,000,000 for shipyards.

"These expenditures will provide plant capacity sufficient to increase our annual production of aluminum to 2,100,000,000 pounds, as against 300,000,000 pounds two years ago; 800,000 tons of synthetic rubber a year, as against 25,000 tons. The synthetic rubber plants should come into production during 1942 and '43.

"November, 1940, we contracted for the purchase of Bolivian tin ore, and constructed a \$5,000,000 tin smelter in this country. We immediately started importing tin ores, and have more than a year's supply on hand. The smelter has a capacity of 42,000 tons of fine tin a year, and is being expanded to a capacity of 72,000 tons.

"We have agreed to buy the entire 1942 Cuban sugar crop, except a small amount for their domestic consumption, this will involve more than \$200,000,000 we have rehabilitated a railroad in Newfoundland and developed new airlines in South America.

Jones said he thought it was a fair assumption to say "we never really got going either in spirit or in action until after Pearl Harbor."

But, he said, "we are not yet delivering to the battlefronts the equipment, the material, necessary for our boys to really show what they can do."

"There should be no idle brains, idle hands, or idle machines. If we use all of these with intelligence with no lost time and no lost motion, we need not fear the outcome."

Oil of cloves, used in medicines and scented soaps, is made by distilling cloves in water.

Still Not Producing Enough, Says Tryman

CHAPEL HILL, N. C., Apr. 30.—(AP)—"We have made great strides in our war production program since Pearl Harbor, but we are still not producing enough," Senator Harry S. Tryman (D-Mo.) head of the Senate's Investigating Committee which exposed Standard

FOUR SHOW GIRLS GET \$1,000 EACH

That Is All Left For Them In William Guggenheim's Estate

NEW YORK, Apr. 30.—(AP)—A little over \$1,000 isn't chicken feed, but neither is it the wealth four former show-girls were led to believe they would get from the estate of the late William Guggenheim.

With the completion of the tax appraisal of the industrialist's estate today, it was revealed that the estate once estimated at "more than \$1,000,000" was in fact worth only \$10,458.28 net, and \$27,775.91 gross.

Mrs. Aimee F. Guggenheim, widow, claimed \$4,956.04 of the net under the law, leaving only \$5,502.24 to be divided equally among the four young women named as residuary beneficiaries.

The four are Lilyan Andrus of Hollywood, Calif., Mildred Borst, Florence Sullivan and Mary Alice Rice, all of New York.

Guggenheim, one of the seven sons of Meyer Guggenheim, founder of the family's copper fortune, made no provision for his widow nor his son, William, Jr., in his will, stating that they already had been provided for adequately.

Miss Borst said recently that she met the elderly mining executive backstage in a New York theater, and that he "considered me his protegee" and "wanted to help all of us along."

Oil's contracts with Germany, asserted in an address at the University of North Carolina tonight.

Speaking under the auspices of the Carolina political union, non-partisan student organization at the University, Senator Truman said that "we have a tremendous job facing us in the immediate months ahead."

"While we are producing vast amounts of planes and tanks and guns in our factories throughout the United States, the problem we have now is to move them into the hands of our fighting forces throughout the world," he said.

"Never before has it been as necessary to build so many ships in so short a space of time. The President has set a goal and has given to the Maritime Commission the task and responsibility for filling the needs of our merchant fleet. Twenty-three million dead weight tons of merchant shipping must be produced in the next two years. In the year 1942, 750 merchant ships must be built—in the year 1943 fifteen hundred. And these are not maximum goals."

Enumerating mistakes he said this country has made in the past Senator Truman said war production was retarded because "private industry would not develop a synthetic rubber industry with its own resources and the government was unwilling to finance the program."

Two Face Charges Of Spreading Fires

WAYNESVILLE, N. C., Apr. 30.—(AP)—Hub Parker, 44, and N. L. Reece, 17, were arrested today and arraigned before U. S. Commissioner W. T. Shelton charged with spreading fires in the Pisgah National forest.

The men will be given a hearing Saturday morning. Reece's bond was set at \$2,000 and Parker's at \$5,000.

WPB Will Curtail Power If Necessary

WASHINGTON, Apr. 30.—(AP)—The War Production Board announced today that it stood ready to order curtailment in the industrial and residential use of power anywhere in the country, to cope with shortages whenever they occur.

"In some areas shortages of electric power already have occurred, and in others further shortages are threatened," the WPB
