

ORDER FOR NEW HOMES APPROVED

Half Of 800 Demountable Units Contracted To Georgia Firm

Go-ahead signal on construction of half the 800 prefabricated, demountable shipyard worker homes to be built here, was given by the Harden and Ramsey company of Atlanta, yesterday. The Georgia firm was successful bidder on the first 400 units to be made.

Negotiations are under way with the Green Lumber company of Laurel, Mass., for construction of the second 400, according to Executive Director Henry R. Emory of the Wilmington Housing authority. However, he said, the WPB has not authorized release of the lumber to be used on the project.

At the same time, U. S. District Attorney J. O. Carr revealed that proceedings to condemn the 123.31 acres of land near the southern end of the yards of the North Carolina Shipbuilding company, on which the homes will be erected, were filed yesterday.

A declaration of taking, which will place the government in ownership of the property, has been forwarded to Federal Judge Isaac M. Meekins in Elizabeth City and is expected to be returned here tomorrow to be filed with the clerk of the district court.

A check for \$15,609.56 has been deposited by the government to cover the cost of the land, which involves approximately 50 parcels, Mr. Carr said.

Representatives of the A. H. Guion company of Charlotte, to whom the contract for site improvements for the project was awarded by the housing authority here last week, arrived here Monday to begin work on leveling off the project site, laying out streets, installing electric and sewer facilities, and constructing a community building for the project.

Hardin and Ramsey representatives are expected here Monday.

The contract with the Guion company sets September 8 as the date for the completion of the site improvements and the contract with Hardin and Ramsey sets October 8 as the date for the completion of the first 400 homes.

However, Mr. Emory pointed out, it may be possible to complete and occupy some of the 400 units before that time, if the War Production board will sanction the project.

The Green Lumber company constructed and installed the 475 prefabricated, demountable homes in Lake Village, one of the authority's five war housing projects here. The units built by the Green company for the new project will be similar to those in Lake Village, while those built by Hardin and Ramsey will be slightly different, Mr. Emory said.

Interior remodeling of the Boys' Brigade club will be complete within two weeks and an "open house" held, Executive Director William Stewart said last night.

Since the organization's clubhouse at Second and Church streets was damaged by fire during the winter, the building has been completely renovated and the exterior painted. Activities of the club, however, have continued while the work was in progress.

New electric wiring and sanitary and water systems have been installed, the auditorium and gymnasium reconditioned and a complete kitchen and fireproof furnace room added.

Boys' Brigade To Hold Open House In 2 Weeks

Stewart said date for the open house will be announced later to enable the public to see the building and its new features.

192,269 Miles Traveled By County School Buses

Traveling 192,269 miles during the nine-month school session just ended, New Hanover county buses transported a daily average of 2,183 pupils, 924 high school students and 1,259 elementary children, according to information released Friday by John O. Marshall, business manager of the board of education.

Mr. Marshall said almost twice as many children were transported daily during the recent session as during the previous year. He explained that the increase in the number of pupils riding buses was larger than the increase in enrollment because some children had to be transported to schools in other districts due to the lack of space in schools in their own districts.

He added that it will not be necessary for as many children to ride buses next year when the new school buildings, now under construction, are completed.

The county system operated 19 buses for white pupils, four for negro children and one by contract driver at a total cost of approximately \$950 per driver—including the driver's salary, operation and maintenance of bus.

"The fact that these 23 men maintained New Hanover county's record of never injuring a school child is sufficient tribute to the way they fulfilled their duty as bus drivers," Mr. Marshall declared.

He said no accident of any kind resulting in damage to a bus loaded with school children occurred during the session.

"We recognized the fact when more than 100 children were carried in a bus one day it was something which should not be done and we hope it will never have to be done again," Mr. Marshall said.

He pointed out that school officials more than spent the budget to get new buses to relieve the situation and that the board bought all buses that could be obtained.

Army Hospital Bidders Announced In Asheville

ASHEVILLE, June 11.—(AP)—Low bidders were announced today after the opening of bids for construction of the Army's new general hospital about 12 miles from here on the Asheville-Black Mountain highway but the amounts involved were not disclosed.

The contract was divided into four sections. The low bidders were: Reed and Abee of Asheville, the Grinnell company of Charlotte, Fowler and Jones of Winston-Salem, and the Durham Electric Construction company of Durham.

NATIONS AT WAR RESPECT RADIO

Chairman Tells Congress Of Mutual Agreement In Countries On 'Jamming'

WASHINGTON, June 11.—(AP)—Warring nations mutually refrain from the promiscuous "jamming" of opposition radio broadcasts, Chairman James L. Fly of the Federal Communications Commission testified today at a Congressional hearing.

Appearing in connection with proposed changes in the Communications Act, Fly told the House Interstate Commerce Committee that the FCC was monitoring (listening in on) virtually every broadcast emanating from enemy countries and was making the information obtained available to war agencies.

In reply to questions by committee, Fly said most of the foreign propaganda broadcasts were sent by short wave and could be rendered ineffective by "jamming" them, creating air interference to make them difficult to be heard.

However, he added, "jamming" is rarely resorted to because of a mutual, if unspoken, understanding among the nations not to interfere with the broadcasting activities of the others and lead to a situation whereby all broadcasts might be made impotent.

The FCC head did not definitely state that the world's powers had reached a binding agreement on this matter, and committee members did not press him for a more complete explanation of the nature of the mutual understanding.

As part of its program of policing the air waves, Fly said, the commission is monitoring "everything that isn't directly explicable on its face." This policing job, he said, was the "most significant" work being done by the commission at the present time.

Two North Carolinians Commissioned In Army

MIDLAND ARMY FLYING SCHOOL, Texas, June 11.—(AP)—Two North Carolina men were awarded commissions as second lieutenants (bombardiers), here today.

They were Lieut. Edwin G. Young, son of Mr. and Mrs. James L. Young of Franklin, and Lieut. Ernest A. Simmons, son of Mr. and Mrs. W. T. Simmons of Lillington.

Three Cups Of Coffee Instead Of Four

—That's the way to share with your neighbor our country's limited supply of coffee. Don't waste it. Measure both coffee and water accurately when you make coffee.

CLOROX... "FIRST AID" IN HOME HEALTH DEFENSE!

AN IMPORTANT problem facing America's leaders today is greater health protection in every home. For healthier families mean higher morale... increased efficiency... a stronger nation. One of the simplest yet most effective health measures is to make household "danger zones" Clorox-clean. Let Clorox provide "first aid" in the health defense of your home... simply follow directions on the Clorox label.

Clorox adds sparkle, freshness, and more important, sanitary cleanliness in kitchens! Germs in kitchens are easily transmitted, especially on dishes and glassware. That's why it is important to use Clorox regularly for disinfecting dishes, glassware, refrigerators, drainboards, sinks, dishcloths, dish towels and other "danger zones." Clorox deodorizes as it disinfects, removes stains too.

Bathrooms, too, need regular Clorox-cleaning! Washbasins, bathtubs, toilet bowls may look clean, yet harbor millions of dangerous germs. Clorox disinfects, deodorizes, removes stains from tile, enamel, porcelain, linoleum, wood. Clorox has exclusive qualities... it is free from caustic, intensified in germicidal action... is effective yet gentle in its many personal uses.

HOME HEALTH DEFENSE IS ESSENTIAL TO NATIONAL DEFENSE

CLOROX is an important aid in Public Health Defense as well as in Home Health Defense! Clorox is used as a precaution against bacterial contamination of drinking water; for sanitation in restaurants, soda fountains, taverns, dairies and other food processing plants; in diaper laundries; for preparation of surgical solutions and for general sanitary uses in hospitals.
