citizen it is important. We reproduce it here in full:

The flag of our country is due far greater respect than is being paid it today by our civilian population. One of the first acts in the life of a soldier is to learn the salute to the colors. On any occasion today when the colors pass or the National Anthem is played you will find the man in uniform standing silently, reverently, and seriously facing the flag and the music. In contrast the man not in uniform goes

carelessly about his business or stands idly talking during the playing of the Star Spangled Banner. This grates on the soldiers of today and it grates on us who went overseas under that banner.

This is not to be judged as an act of disrespect to the flag but rather a careless act void of the respect due the emblem under which your brothers and sons have

It is beyond my powers to describe to you the present sufferings of the Greek people. Reports reaching us from the homeland raise the rate of daily deaths in the Athens district alone to several hundreds.

The food that my government so far has been able to direct to Greece with the consent of the Allies has relieved only slightly the plight of my people. But I hope that we shall soon be allowed to send to Greece increasing quantities of food and medical supplies. The contribution of the American Red Cross would be, in such a case, most important.

It has been possible, he adds, to evacuate some thousands of women and children into the Middle East, where they are receiving aid from the Red Cross, but the percentage of the starving population of Greece thus escaping is pitifully small compared with the great number who must perish if aid is not forthcoming.

It must grieve any normal person to know that such barbarity as the Nazis are practicing can be done to counteract it; and also to know every dose of medicine, every creature comfort which can be sent for the relief of the Greeks is just so much gained by the Axis.

That is the crushing truth. It is also the most stimulating incentive to fight this war to

The Bohemian town of Lidice has been "leveled to the ground and the name of the community extinguished." Isn't it about time to define what we mean by a "just peace" with Germany? The town of Lidice, a poor, coal-mining village, was near Kladno. Are the citizens of that community to determine what is "just"? The answer is, they are. It is they who will arise when the great Nazi retreat begins, from behind every tree and every ruined wall: they who will say

that the beaten and broken Nazi thugs shall have no water, no food and no truce; they accepted lightly. Full cooperation and complete who will insist that no mountain, no valley, no depth of the sea, no island shall save the guilty from retribution; they who will avenge Lidice.
