The undersigned having qualified as executor of the estate of Anne B. Linder, deceased, late of the County of New Hanover, this is to notify all persons having claims against said estate to present them to the undersigned or his successor on or before the 29th day of June, 1942, or this notice will be pleaded in bar of their recovery. All persons indebted to said estate will please make immediate payment to the undersigned.
This June 28, 1942.
W. A. SIMON, JR.,
Executor,
714 Murchison Building,
Wilmington, N. C.

TRUSTEE'S NOTICE
Take notice that the undersigned by the order of the Honorable J. J. Burney, Resident Judge of the Superior Court for the Eighth Judicial District, has been authorized, empowered and directed to declare and disburse a 15% dividend to the stockholders of record of the Progressive Building and Loan Association, of Wilmington, North Carolina.
Owners and holders of unpledged stock are required to present their Trustee's Certificate in order to obtain dividend checks.
This the 27th day of June, 1942.
W. D. HUGHES, Trustee,
Progressive Building and Loan Association.

EXECUTOR'S NOTICE
Having this day qualified as Executor of the Last Will and Testament of Mary W. Wentress, late of the County of New Hanover, deceased, this is to notify all persons having claims against said estate to present them to me before June 28, 1942, or this notice will be pleaded in bar of said recovery; all persons indebted to said estate please make immediate payment.
This 25th day of June, 1942.
THE WILMINGTON SAVINGS & TRUST COMPANY,
Executor of the Last Will and Testament of Mary W. Wentress.

PORK PRODUCTION
RALIGH, June 27. (AP)—Push ing pork production as a contribution to the Food-for-Victory program, North Carolina farmers saved \$12,000 of this year's pig crop, 28 per cent more than last year, J. J. Morgan, State Agriculture department statistician, reported today.

AMERICAN OFFICERS JOIN BRITISH 'BATTLE SCHOOL'
NORTHERN IRELAND.—Officers of the American contingent here, along with British officers, are undergoing intensive training in modern methods of attack at a British "Battle School." Advancing through mud and water over all types of country, cliff climbing and river crossings—always under fire—give these men full knowledge of today's warfare. After a thorough course at the school, they return to their units as tough and fully qualified instructors. Above, American and British officers charge across a wide stream while exploding mines around them create all the din and confusion of battle.

CHANGE IN MARKER STANDARD SOUGHT
Chamber Asks Highway Commission To Raise Standard Of Wilson Plaque
The Greater Wilmington Chamber of Commerce yesterday asked the State Highway and Public Works Commission to raise the standard holding the Woodrow Wilson marker, on Third street about 20 inches to increase its visibility.
The marker commemorating the memory of the war president's residence in Wilmington was recently placed on Third street, just north of the First Presbyterian church.
The chamber of commerce explained that throughout the day automobiles are parked along the curbing, hiding the marker, the standard of which stands only 47 inches from the ground. This lack of height militates against visitors and tourists seeing the sign when cars are parked parallel with it.
The president's marker was compared with that of the Whistler one which stands a few yards away and has a distance between the bottom of the sign and ground of approximately 67 inches.
Elevation of the marker may require the slight trimming of several branches of trees, said the chamber, but promised the cooperation of city authorities in this respect.

Sunday School Lesson
Text: Proverbs 21:17; 23:32; Isaiah 5:20-23; Hosea 4:11; Joel 3-2, 3; Ephesians 5:18
By WILLIAM E. GILROY, D. D. Editor of Advance
It is obvious that alcohol is the occasion of an immense amount of propagandism. For many years those who favor total abstinence and who have been opposed to the liquor traffic have carried on extensive and highly organized propagandism, while of late years propagandism in defense of moderate drinking has also been extensive, if not on an equal scale. Propagandism in itself is neither good nor bad. Education, the preaching of the gospel, movement for better social conditions, advertising and publicity are all forms of propagandism. The difference between true and false propagandism is that the one is concerned about establishing the truth and the facts while the other is intended to mislead, and the one legitimate question to be asked in relation to all propagandism is, what are the facts?
Effort to distort or to overstate the facts either against, or in favor of, the drinking of alcoholic beverages will in the long run defeat the purpose of the propagandist. The speedy enactment of prohibition with its speedy repeal ought to remind us, whatever our viewpoint, how great and quick reaction can take place where people are influenced by high pressure propagandism without being fundamentally convinced.
It is obvious that there is today considerable confusion as well as much honest difference of opinion concerning the facts. The writer is, and has been all his life, a

Medical Care
By LOGAN CLENDENING, M. D.
One of the fascinating things about modern medical research is that something may be discovered which looks like a very rare and unusual condition and after investigation it turns out that it throws a great deal of light on some old and common condition.
Sciatica, or neuralgia of the sciatic nerve, is certainly one of the oldest of human complaints. The medical profession had about given up expecting to find anything new about it and, lo and behold, recently a condition was discovered which probably explains 75 per cent of all cases of sciatica.
The sciatic nerve is given off from the lower part of the spinal cord, emerges from the openings between the lower vertebrae, goes down over the sacro-lumbar joint and comes out into the leg about near the bone that you sit on and is distributed to the back part of the leg and calf. When it begins to ache—the condition which we call sciatica—it causes about as excruciating discomfort as anything that can happen. Medical men have ascribed the cause of sciatica to inflammation or injury of the nerve everywhere along its course from sacro-lumbar strain to impingement on the nerve in the sitting posture, to local infection, and so forth and so on.
Not long ago, in fact as short a time ago as 1934, some surgeons found that slight injuries would cause a peculiar condition in the vertebral column. The bodies of the vertebrae are separated by a cartilaginous cushion in the middle of which is a soft globule of tissue called the nucleus pulposus. This nucleus pulposus gets pushed around with considerable ease and can be herniated on between the vertebrae, causing pressure on the spinal nerve roots.
At first this was considered to be quite rare but in the time that has intervened it is found more and more often as diagnostic thought has become more alert; doctors have been taught to look for it. Furthermore, a great many cases of low back pain and sciatica have been found to be due to this cause. When seen at operation, the nucleus pulposus is sticking out between the vertebrae and stretching the roots of the sciatic nerve so that it is evident to any observer that it is causing severe pain.
As I said above, some neurosurgeons believe that this causes sciatica in as much as 75 to 80 per cent of all cases. The condition can be relieved by very simple surgical procedures which remove the protruding nucleus pulposus and take the strain off the roots of the sciatic nerve.
Of course, it is advisable to try every form of conservative treatment first, such as resting the patient in a plaster cast, manipulation, injection of the nerve and taking plenty of time before trying surgery. In order to prove definitely whether sciatica is due to herniated nucleus pulposus it is possible to visualize it with properly planned x-ray studies.
QUESTIONS AND ANSWERS
H. A.:—What is meant by the loss of a reflex and what bad symptoms or pains does it cause?
Answer: A reflex is a subconscious impulse that goes through the nervous system, starting as a sensory impulse and coming out as a motor impulse. For instance, if you touch something red hot without warning, you pull your hand away; that is a reflex. The sensation of heat and burning makes the muscles move. A reflex is lost whenever the nervous arc is interrupted. This may be due to neuritis either in the sensory or motor nerves or a destruction of some part of the spinal cord. Loss of a reflex is not in itself associated with pain although some of the diseases in which reflexes are lost have pains as part of their symptomatology.

BLUE STAMP LIST IS ENLARGED HERE
Three Fresh Fruits And Irish Potatoes Will Be Available During July
Three fresh fruits and Irish potatoes have been added to the list of Blue stamp foods available during July under the Food Stamp program in New Hanover county, Lawrence T. Scott, acting area supervisor of Agricultural Marketing Administration, said Saturday. Fresh peaches, fresh plums, and fresh apples are the fruits added. These, together with oranges, all fresh vegetables, including Irish and sweet potatoes, and the staple foods continued on the list, will give participants a wide variety from which to select the foods they require.
Dried prunes and fresh grapefruit are the only two commodities removed from the July list. Dried prunes are being acquired for use largely by our armed forces and the season of heavy marketing of grapefruit is drawing to a close.
With these changes, the complete list of Blue stamp foods issued by the Agricultural Marketing Administration for July 1 through July 31 in all stamp program areas is as follows: fresh peaches, plums, apples, oranges, a fresh vegetables including Irish and sweet potatoes, she eggs, butter, corn meal, hominy (corn) grits, dry edible beans, wheat flour, enriched wheat flour, self rising flour, enriched self rising flour, and whole wheat (Graham) flour.
"Farmers," Mr. Scott said, "are working to produce abundant quantities of all the food needed by the United Nations. The Food Stamp Program helps to assure them, particularly in seasons of heavy marketings, of a fair return for the efforts they are making. At the same time the program adds many nutritious foods to the diets of families in need."

NEW GAS RATION TERMED 'TOUGH'
Eastern Motorists Cautioned To Prepare For Plenty Of Walking
WASHINGTON, June 27. (AP)—The office of Price Administration cautioned Eastern motorists today to prepare for plenty of extra walking under the new coupon gasoline rationing program taking effect June 22.
Asserting that the new plan "is going to be tougher than the average car user appears to realize," Price Administrator Leon Henderson asserted that thousands of motorists who now have "B" or "X" ration cards "are going to get along on a basis "A" coupon book of less than four gallons per week. "They are going to want to arrange to share rides in order to make the ration go as far as possible," he added.
OPA said its warning was issued because of the apparent impression gained by many motorists that there had been a liberalization in the amount of gasoline to be rationed under the new plan.
"The exact opposite is true," Henderson declared. "While the minimum coupon book will grant a fraction of a gallon more per week than the "A" card grants under the temporary rationing, the conditions that must be met to obtain supplemental rations under the new plan are so strict that most owners will have to get along on the minimum."
He said that two-thirds of the eastern motorists now had some form of extra ration above the minimum.
OPA officials estimated that the "tailoring" of the "B" coupon books under the new plan—by prescribing expiration dates—would reduce the driving of about 25 per cent of the drivers in the "B" class. In addition, car owners are required to form car-sharing clubs to carry four or more persons to work as a qualification for supplementary allowances.

FLASHES OF LIFE
(By the Associated Press) SILVER LINING
PHILADELPHIA — Somewhere in Philadelphia, a poor boy about six years old is wearing a coat worth \$350 cash.
A woman told the Salvation Army she forgot the money sewed in the lining when she turned in the coat several weeks ago.
She couldn't give her name — her husband didn't know she had the money.
THAT'S MY BOY
PULASKI, Va. — Sheriff C. E. Jones passed the names of three Navy applicants to Deputy Wiley Faw to investigate.
"One of them's Earl E. Faw. Any kin to you?"
"Nope," said Faw, "never heard of him."
Faw telephoned for an hour trying to locate the man. Suddenly he let out a whoop.
"By cracker, that's my boy. Benny." Earl's middle name is Benjamin.
Deputy Faw is now carrying a list of the official names of his 12 children.
DOLEFUL DRIBBLE
MARTINEZ, Calif.—A big truck rolled along the highway to Stockton, loaded with kegs of nails.
A couple of kegs shook loose; others rattled around. Nails began dribbling out.
An incomplete count over the 50 miles showed 30 mournful motorists looking glumly at flat tires. One large truck at the roadside had six flats.

ARMY TO USE WOODEN BEDS TO SAVE STEEL
WASHINGTON, June 27. (AP)—To save steel, the Army has decided to use wooden beds instead of folding steel cots for soldiers. The War Department said today the beds may be fitted together and formed into double deckers. The first purchase by the Quartermaster Corps, it was estimated, will permit diversion to other war needs of some 31,500 tons of steel.
SORRY, THAT'S ALL!
LOS ANGELES — The state department of motor vehicles asked Lemuel Rufus Robertson to surrender his driver's license.
As a souvenir, though, the department sent him a letter of commendation for his perfect safety record at the wheel since 1926.
Reason for the suspension: His age. He's 80.

CLAUSES ISSUED
NEW YORK, June 27. (AP)—The American Institute of Marine Underwriters today issued a set of "wartime extension clauses" which can be added to Marine insurance policies upon payment of an additional premium.
