## Don't Stick Your Neck Out

By BETTY CLARKE

Wide World Beauty Editor Will your neck stand the test of sticking it out for inspection? Double chins, sagging muscles and crepey throats speak louder than words in giving away a woman's age.

Hildegard, chief canteuse, is concerned with the interior of her throat as a singer. But as a showman she is vitally interested in its outer appearance too. She explains, "A really beautiful throat is as important to a woman as a pair of deep blue eyes, a perfect hair-do or slim hips. And there's no reason for any woman to have an unattractive throat and profile."

The lovely-throated songstress uses three methods of throat care. The first is the simplest. You merely correct your posture. Your head should be held straight and high. When you walk or sit, you should feel a pull—as though someone were lifting you by the ears.

The next method suggested by Hildegard is exercise, and she thinks you ought to do it in private. "You can't very well go around chewing like a snap turtle in front of people. Yet chewing is wonderful for your chin. It in-

creases muscle tone and keeps the flesh flexible." The idea is to chew with a snapping motion, releasing the jaws suddenly and then snapping them closed abruptly. Massage is the last step. Hildegard says it's good for the neck

outline and for the skin texture. Use a tissue cream every night and smooth it on gently. Never slap the skin, and always massage the throat and chin upward so as to avoid pulling the skin down into sagging lines.
