

SHIPYARD WINS SAFETY AWARD

The Distinguished Service to Safety award of the National Safety Council, for 1945, has been awarded the North Carolina Shipbuilding company, officials of the shipyard announced yesterday.

The company won the honor by establishing an accident frequency rate substantially below the most recent averages for similar organizations and by showing marked improvement in comparison with the previous year.

Formal notification of the award—one of the highest in safety—was received here from Ned. H.

Dearborn, president of the council. In his letter, he said:

"This award is granted only to those organizations which have made an outstanding safety record. The directors and staff of the National Safety Council join me in extending you our heartiest congratulations on your fine achievement and our best wishes for its continuation in the future."

During the year, the shipyard did not have a single industrial fatality and reduced accident frequency and severity approximately 64 per cent in comparison to the previous 12 months.

Plans for the presentation of the large banner and certificate are expected to be started in the near future.

Benjamin Franklin was born Jan. 17, 1706.

THE OLD JUDGE SAYS . . .

HARRY: "I don't know what they'll weigh up, Judge, but my cattle and poultry sure have been gettin' fatter since I started to use distillers' dried grains in their ration."
OLD JUDGE: "You're about the tenth one who has told me that, Harry. How do you account for it?"
HARRY: "The by-product recovered from grains used by distillers is very high in vitamin and protein content. It's the best feed supplement we can get to balance the rations we feed our dairy cows, livestock and poultry. Mixed with original grain, these distillers' dried grains have a much greater feeding value than the original grain has."
OLD JUDGE: "Have any trouble getting all you need?"
HARRY: "Yes, at times, even though the distillers produced 1,200,000,000 pounds of it for the year endin' last June, I hope they'll be in a position to produce a lot more next year."
OLD JUDGE: "Then I guess nobody can tell you grain is wasted in distilling."
HARRY: "Not me, Judge . . . I know."
