YOUR WILMINGTON TODAY

Study Of Past Mistakes Used To Chart Future

Wilmington, from every reliable indication, is today on the threshold of prosperous and sound economic growth unparalleled in its long history. A new confidence grips its business and professional leaders. To analyze and report upon this confidence and what it is producing, The News begins with this issue a highly informative and objective series of articles under the general title "Your Wilmington Today." The opening article concerns itself with the factors and personalities responsible for creation of an organization which bids fair to become the cornerstone of the new Wilmington—Industrial Properties, Inc.—Editor.

By KEN R. NOBLE, Staff Writer

A community's economic machinery knows no such and day-to-day living expenses thing as a standstill. Its wheels must go one way or another -forward or backward.

No more striking proof of this thesis exists than in the millions in war-time wages and record of Wilmington during the decade and a-half following profits do the community. the end of World War I—a 15-year-period that saw a city with the carolina's largest and most prosperous by impressed upon the group of potentially North Carolina's largest and most prosperous fall by the wayside in the competition for the life-blood of comprised the City-County Planany community: the wage-earner's dollar.

came to an end.

and back and back until it took on and pack and did a city-once the largest in the state and with potentialities unmatched by any other community in North Carolina—decline to vir-

want of other outlets. Money to be spent. But where and how? Money-Filled Banks

World War I, when war-accumulated cash began to seek investment fields, where did it go? Much of it went to New York and the stock exchange. There it merged poured in from around the country to become a part of the dizzy speculative era that ended in October, 1929.

That portion of it which remained at home—and a goodly sum did remain at home—dribbled off in deflated real estate values when the depression struck its hardest in the early Thirties.

ning board appointed by the City council and the Board of County convincingly, that the nation-challenging question, a small wide depression paralyzed group of Wilmington businessmen in the State senate in 1943. Com-Wilming ton's economic three years ago began to do some growth. The record of other fact-finding. The object of that H. A. Marks, W. E. Curtis, C. B. North Carolina cities, and other cities throughout the entire munity a quarter of a century ago, Thomas described in the control of the cities throughout the entire munity a quarter of a century ago, Thomas described in the control of the cities throughout the entire munity a quarter of a century ago, Thomas described in the control of the control o the group began to think of post-Witness the phenomenal growth of happen again when World War, wouldn't the group began to think of post-Charlotte, of Greensboro, and the sands of dollars in World War II whole Piedmont sector.

Why did Wilmington slip back, Why did Wilmington slip back, Interesting. And alarming; alarming into the banks and building and

ing because of the startling paral- loans every day. Could it happen again? Hadn't years. Wilmington, in the midst of people learned a lesson? Maybe. unprecedented prosperity in 1944, But that was leaving it to chance. was in almost exactly the same And chance has a habit of leaving a lot of sorry bag-holders.

The decision was made, in its To learn the answers-and they Its banks were loaded with rough outlines, that steps must be

money - war-brought money; taken to prevent a repitition of the move out of the industry-congestmoney accumulated in savings for debacle of the Twenties and want of other outlets. Money to Thirties Thirties.

And out of that decision grew small organization; The Wil- In the way of floor space?" In the first year or two following mington Associates. Nothing formal, and nothing complicated. Its ranks were open to any business or professional man who professed an interest in his community. The initial meeting, called by Mr. with millions and then billions that Hogue, was attended by 28 men, each a successful business or professional man, and each financially able to back up his convictions with a substantial check if the right formula could be found.

One Common Bend This group had one thing in common - one bond that was to hold it together and see the idea take tangible form: that if Wilmington were to avoid the mistakes it and its citizens made after World War I, the corrective measures would have to start right here at home. Translated into still simpler language, if the money Wilmingtonians had accumulated during the war was to mean anything to the community, the bulk of it had to remain here and be put to work in the economic arteries of the community. How to do it? And who was to do it?

The Associates were convinced that the future welfare of the community lay in development of its economic resources. But what resources did the community pos-

First, by virtue of the war boom which brought thousands of newcomers to work at the shipyards and on military reservations hereabouts, the city had acquired, through federal agencies, a tremendous amount of low-cost public housing. Interpreted in economic terms, low-cost housing means well - sheltered employes, something every modern employer, in dividual or corporation,

Secondly, nature has blessed Wilmington with a temperate climate—the sort of a climate where heating bills don't eat up a sizeable hunk of take-home pay, and the kind of climate where a man, if he's so inclined, can spend his leisure hours, or a part of them growing table vegetables and maybe have a few chickens. Its all very economic. And very

simple. Thirdly, Wilmington has, for all of its geographical isolation in relation to other trade centers of North and South Carolina, excellent transportation facilities. There's the river with its oceangoing ships; there are two major from Hampton Roads, loading full railroads; there is a network of fine highways linking the city with north, south and west. And, again thanks to the federal government in this coming Air Age, there's Bluethenthal airport, largest and one of the finest airfields in Amer-

Fourth, the war-brought industries had trained a tremendous pool of skilled labor, the majority of which lives within a 50-mile radius of Wilmington.

Those are resources. Those are the resources Wilmington hadand has-to offer industry.

Taking stock of the community's resources, the Wilmington Associates set out to learn if anyone would be interested. The first inquiry was conducted by the Tide Water Power company, through ts industrial division. One trip to the New York area produced several promising leads. Harriss Newman, attorney, and currently serving on the city council, found

There were plenty of firms and an aggregate total of approximaplenty of businessmen who heard tely \$140,000 annually in increased the story and who became interpay as the result of a general 15 ested. Their reaction was something on this order:

"Yes, I'm interested. I want to corporation president.

ing the South. But what can you offer me in the way of a plant?

The answer had to be "Noth-NUERNBERG, Jan. 30.-(P)-Wilmington, being a city essentially engaged in distribution

The 1944 bomb plot against Adolf sistant commandant of the United Wilmington, being a city esand, to some extent, in agriculture, had no factory buildings, no large inclosed spaces to house even the smaller industries which could produce here.

To these extent, in agriculture, had no factory buildings, no dent Roosevelt, Prime Minister of four years. The appointment carries the rank of rear admiral O'Neill would succeed Rear Admiral I. T. Challes where the product of the United States Goast Guard for a term of four years. The appointment carries the rank of rear admiral O'Neill would succeed Rear Admiral I. T.
