We, The Women

Those Flint Housewives Were Just Fed Up

BY RUTH MILLETT
After their husbands had been on strike for 71 days, a group of Flint, Mich., wives organized to persuade the men to go back to work.

It sounds as though the women might be fed up with having their husbands underfoot all day. For there is nothing that upsets the average woman more than having a man at home when, according to her routine, he ought to be at work.

Her day is planned on the assumption that after she gets her husbands off in the morning she will have a certain number of hours entirely her own.

If she has a beauty shop appointment or a bridge game scheduled for afternoon she can rush through her work in the morning. If there is nothing on her calendar for afternoon she can slacken her pace to accommodate a leisurely reading of the morning paper—

which her husband reads at breakfast—and if she likes she can gossip with her friends on the telephone without having to defend her 30-minute conversations to an amused or irritated male.

THEY'RE MEDDLERS
But when the man of the house is at home the day must revolve around him. Furthermore, a man around the house in the daytime is either the efficiency expert who wants to systematize the home or the seeker of peace and quiet who has no tolerance for the noise of a vacuum cleaner or washing machine and can't understand why his wife can't sit down and relax like he's doing instead of "fussing around."

"Can't that wait awhile?" asks when she makes motions like a housewife. But all the same he expects the meals to get cooked, the beds made, etc.

No matter what highfalutin' reasons the wives of striking husbands may give to their husbands and to each other for trying to get their men back to work, any wife who has had a husband take his vacation at home is sure to suspect the women are just anxious to get their house back to themselves.
