# DEATH RIDES THE HIGHWAY

# Holiday Death Toll

By The Associated Press The nation's violent death toll rose to 205 yesterday as the half-way mark neared in the long Independence day week-

The fatalities-well below advance forecasts of the National Safety Council-indicated most vacationists were mixing cautio nwith pleasure.

Council Forecast Te council estimated the fourday holiday period would result in 1,300 violent deaths, 450 of them in traffic accidents. Of the total, the council said, 800 probably would be killed outright, including 275 traffic accident victims.

From 6 p.m. (loca)
Wednesday to late Fr persons were killed accidents 51 droy died from miscella.

Sunny Elsewhere The low accident death rate was held in the face of ideal highway travel and swimming conditions as sunny moderate weather prevailed in most sections of the country. The council said pleasant weather normally boosted the accident toll as more persons took part in activities exposed to risk.

#### WORLD TRUSTEESHIP

### International Control Asked For Atom Material

NEW YORK, July 5.-(AP)-International ownership of all atomic raw materials was put forward by the United States Friday as one of the essentials of an effective atomic control

A lengthy memorandum submitted to the Atomic Energy commission by Ferdinand Eb erhardt, a member of the U.S. delegation, recommended that the proposed atomic control authority have power to control the mining and processing of uranium and thorium as well

as the actual production of atomic energy.

"The authority, in short, must have such control of mining and concentrating operations as will assure its complete and absolute ownership of all uranium and thorium actually produced," the document said. The memorandum set forth in detail the United States' views on atomic control previously outlined by Bernard M. Baruch at the opening meeting of the commission.
