10 per cent on the area that the survey includes. These reports came from all over the county with the exception of Hallsboro and Bolton area which it was reported was the hardest hit area.

Loss 25 Per Cent Reports dribbling in indicate that the damage in the Hallsboro and Bolton areas may be about 25 per cent but as a whole, unless there is some unpredicted or unforeseen trouble ahead for growers, the figures for the entire crop damage to tobacco in Columbus county will be around the 10 or 15 per cent figures.

It is believed, with still the Bolton and Hallsboro areas to be heard from, that the actual damage to the tobacco crop in Columbus county is much less than the figures revealed in the reports that reached this office more than a week ago.
