

FORECAST:

Wilmington and vicinity: Considerable cloudiness with scattered showers, not so warm today; Tuesday, cloudy, few thunderstorms, little change in temperature.

Senator Hits European Aid

Revercomb Of West Virginia Blasts Marshall Plan As Unsound

WASHINGTON, July 6. — (AP)—Senator Revercomb (R. W. Va.) today criticized the "Marshall plan" as a new deal for the countries of Europe that might cost the United States from 18 to 24 billion dollars.

"You cannot buy friendships — you cannot buy peace," the West Virginia Republican said in a speech transcribed for re-broadcast later in West Virginia.

The plan, advanced by Secretary of State Marshall, calls for the building up of an integrated European economy on a basis of self-help plus U. S. financial aid. It has been rejected by Russia.

Revercomb contended that the foreign policy of the United States "has suddenly changed" from support of the United Nations to the "new plan of America to go it alone."

"The time has come when we must settle upon a policy," he said. "We want to aid other countries and other people, but that help must be within the bounds of our ability to help without injuring our own strength, and it must be upon a basis of help to those who do not hold the threat of war for us."

Revercomb disputed arguments that the United Nations "was not ready to take over the burden of peace-making or that Russia's use of veto power against U. N. action compelled the new United States policy."

He said that the U. N. was able to force Russia to withdraw her force from Iran. He proposed: "If Russia indeed was going to use the veto without reason, then let those who stood against Russia repudiate her and act against her. Then the United States would not stand alone."

The Marshall plan, Revercomb continued, "calls for appropriation and expending of vast sums of money, not particularly to feed people in need, not to shelter them or to clothe them, but to sustain governments."

The Senator said Congressional support of the Marshall plan would require "as much as \$6,000,000,000 a year for three or four years to come."

TRUMAN HITS 65 ON RETURN DRIVE

President Takes Wheel Of Car For Trip To Washington

WASHINGTON July 6. — (AP)—Traveling at speeds sometimes surpassing 60 miles an hour, President Truman today "chauffeured" himself back from Charlottesville, Va., where last week he made an address assailing Russia's stand on the Marshall European relief plan.

At the wheel of a Cadillac convertible coupe with top down, Mr. Truman drove the 117 miles from Charlottesville to the White House in two hours and 45 minutes. He seemed to enjoy himself thoroughly.

Actually, he covered the distance 15 minutes faster than his official chauffeur on the trip down last Thursday.

The President's speed was set by a Virginia State police patrol car which preceded his car, while other cars carrying the White House staff and newspapermen trailed along.

For the most part the President's speed was held to about 50 miles an hour—the limit allowed by state law.

Leaves Colle

Mr. Truman departed from Colle, the Charlottesville estate of Stanley Woodward, state department chief of protocol where he had spent Thursday night, all of Friday and Saturday.

With his eyes shaded by a broad-brimmed Panama hat, he climbed behind the wheel of the convertible, gave the starting signal to the police car, and was off. Riding with him were Fleet Admiral William D. Leahy, chief of staff to the President; Secretary of Treasury John W. Snyder and Brig. Gen. Wallace Graham, the White House physician.

No secret service agent was with him, a circumstance exceedingly rare.

Mr. Truman reached nearly 85 miles an hour shortly after he left Charlottesville. There was little traffic and he encountered few cars until he neared Washington.
