## Salutes HOTPOINT

### On Its Move To Curb Inflation By Reducing Appliance Prices Now

We Are Proud To Join Hotpoint—One of The Nation's Largest Appliance Manufacturers—In the Fight To Preserve The Purchasing Power of The American Dollar By Announcing Price Cuts Of As Much As 10% On America's Finest Electric Ranges, Refrigerators, Disposals and Water Heaters.

Inflation is very much like the weather in that everybody talks about it but nobody does anything about it. But now BULLOCK'S INCORPORATED is joining with Hotpoint—builder of America's finest electric appliances—in doing something about it. Namely, reducing prices on electric ranges, refrigerators, disposals and water heaters.

Price reductions at a time like this when appliances like these are so scarce is news in itself. But all the more noteworthy is the fact that these price reductions—which run as high as \$20 on some models—are made in the face of the biggest demand for Hotpoint products in the company's history.

Certainly, this is proof that this move is made purely in the public's interest. We consider it an outstanding example of the kind of business statesmanship that has made America the country that it is today and the kind that will continue to lead the way to future greatness.

BULLOCK'S INCORPORATED heartily subscribes to this courageous move of Hotpoint's... and is glad to be one of the first in Raleigh in this crusade to cut the cost of living.

Do not purchase Hotpoint appliances from an unauthorized dealer as appliances without model and serial numbers are not guaranteed by Hotpoint, Inc.

### From the FAMILY ALBUM...

## They just called him "Bub"

... Uncle Lem and Aunt Mabel's boy. He had sort of a rough time on that farm way across Hawkins Ridge up until he was grown. Uncle Lem was ailing a lot of the time back then, and Bub had to carry all the water to the stock, cut the stove wood, do the milking, and the other chores, too. He didn't have much time for anything but work, but he did a lot of thinking.

Bub still lives up there on the farm. He has certainly changed the old place though—nowdays nobody carries any water anymore—nobody saws any wood. The chores there now are just play compared to what they were when Bub was a boy. You see, Bub has ELECTRICITY up there now—and he makes it do all the work. "Born thirty years too soon," he says, "but I aim to make the most out of the next thirty."

Electricity can do more than 200 jobs on the modern farm... can save time, labor and money.
