MORE OVER AGE AND HANDICAPPED WORKERS

NEW YORK (NIPS) — Earl Bunting, managing director of the National Association of Manufacturers, disclosed recently that the ability to do a job, without regard to age or physical handicaps, is becoming more and more the general employment requisite of industry and business across the nation.

A check of 300 industrial and business firms in key cities showed that such a hiring policy, which accepts physically handicapped and older workers on their merit, tends toward lower personnel turnover and absenteeism. It was revealed by Bunting.

SAY YOU SAW IT IN THE CAROLINIAN

Such antics, when performed in public, show a lack of home training.

Margin For Logic

BY AL MOSES

VACATION TIME FOR MOST FOLKS summers down to a fine line. At Elmford, and Ludingtonville, N. Y., we met and talked with a number of prominent persons from all sections of the country during the past two weeks. Robert Wheeler a biochemist from Elkhart, Ind. made our stay at Elmford a memorable one.

He is the type of scientist who emerges from his ivory tower long enough to mingle with and study persons who make our work a day lives livable and in many instances highly enjoyable. I gleaned from one of our chats that Mr. Wheeler will devote the next 20 years of his life (he is 27 now) to a comprehensive lab study of how to counteract the poise and common-sense terms his own to earth approach to these scientific laboratory studies and research was most refreshing. I recalled interviews down the years with personalities whose earned titles left them a form of speech much like the ancient Greek Demosthenes, famed for his "mouth full of pebbles" experiment. Something Robert Wheeler dropped in conversation with me will live long in my memory and I hope in yours also.

"It makes no difference how much education you have, you can't escape a term in that school of experience."

HAS IT EVER OCCURRED TO YOU?

That in a discussion of the dozen or less most vivid American personalities in the news at least five Negroes flash for consideration.

Cov. William Hastie, Virgin Islands; Dr. Ralph Bunch; Jackie Roosevelt Robinson; Bill (Bojangles) Robinson; and Joseph Louis. There are many more such as: Rep. A. C. Powell, Jr., Rep. Dawson Chicago, Judge Irwin C. Millison, Dr. Channing Tobias, Walter White, NAACP; Dr. W. D. Gilles, C. C. Spaulding, and others.

Also THAT Twenty-one years ago this very month Egypt, scene of the persecution of the Israelites at the days of Moses, the liberator, herself sought a "Modern Moses" to lead her to freedom from British domination?

That the king of Egypt, probably the most intellectual and best educated royal ruler of any throne back in 1928, fought for equal rights for his people and "self-determination" against the imperial egotism of British namely: The British High Commissioner and the doughty little Welchman, Premier David Lloyd George. Mr. George, who was then the real ruler of Egypt was an iron-willed Englishman of dynamic energy and great tenacity. He was an ultra-

Tory of the most conservative "oldhard" type. His motto was — "Britannia rule" and he believed in the "Iron fist" with appropriate backing from important No. 10 Downing Street in London. The Egyptian King's motto was "Patience." He explored his people to organize and become politically strong in Geo-Politics, etc. He knew that Egyptian independence in his day was "delicious."

SNATCHES PURSE, BUT LEAVES BIKE

ST. LOUIS (AP) — A 17-year-old unidentified youth gave up his bicycle for \$13 last week but the trade was not legitimate and the police are now looking for him.

Unfortunately his exchange was not intentional because he got his \$13 by snatching a purse from a white nurse, Miss Kathryn Fitzpatrick, a little past midnight last week.

He hid his bike behind a hedge and jumped out and grabbed her purse. She held tight until he struck her. Forgetting his bicycle he ran away. Now he cannot get his bike unless the police get him.

Better At Dodging?

CHICAGO — Fewer pedestrians walked themselves to death during 1948 than the year before.

There were 9,350 pedestrian traffic deaths last year, according to the 1949 edition of "Accident Facts," statistical yearbook of the National Safety Council. This was a per cent below the 1947 total of 10,150.

The yearbook points out that last year the first time in our country deaths have been tabulated by type of accident that pedestrian deaths were fewer than deaths from two-vehicle collisions.
