A SOCIALISTIC U.S.A.?

Would you like to live in a socialist America? Most Americans wouldn't. But there's a real danger that we will - whether we want it or not. One of the main roads to socialism is government ownership and control of important businesses. The electric light and power business is one - and this map shows how far the government is in it already. Every white dot - 200 of them - on the map marks an electric power plant now operated or financed by our federal government. Every black dot shows where another government power plant is being built, expanded or proposed. In all - over 700 places in 44 states! And a long step toward a socialistic U.S.A. Most of the people who speak for more government control over American life don't want a socialistic nation. They have other reasons for government control. But when government, moving step by step, controls enough things, whether we want it or not. And, instead of our freedoms, we'll have government control, not only over business, but over churches, schools, homes - our whole lives.
