## Mass Chest X-Rays To Begin Oct. 1

A mass chest survey, to X-ray the county population 15 years of age and over for tuberculosis, is being planned by the county health department. The survey will start on October 1. The survey will reach all parts of the county, and will utilize the mobile unit of 50 different locations. It will start through November 1st.

110,000 persons are estimated to be in the county. However, a total of 75,000 is being used. The first county-wide survey held in 1931, when 7,370 films were taken, by Dr. Bullis, is being repeated. One mobile unit will remain in front of the Wake County Courthouse for the survey. The survey will be held in the following order: Raleigh, Cary, Morrisville, and other places. The survey will be held in the following order: Raleigh, Cary, Morrisville, and other places.

## Golf Tourney Proves To Be A Big Success

GREENSBORO — 72 golf enthusiasts turned out under blue skies to participate in the Anniversary Tournament held Sept. 19, at the North Puck Golf Course here in celebration of the 4th year of operation for the first Negro Municipality owned golf course in the south. The tournament, an 18 hole play was governed by U. S. G. A. rules and had players divided into men's and professional groups. The men's group was further divided into classes A, B, and C. Murphy Street, with 72, won the men's class A. Hubert Nichols, 77, John Croft, 78, and L. Everhardt, 79, took second, third and fourth places respectively in the class.

## Attention Women

For commercial flower growers and amateur botanists interested in the flowers of their locality or region, the U. S. Department of Agriculture has published a guide to publications on popular flowers of the United States and Alaska. The new bulletin lists by author and describes briefly 25 general publications, 52 on the Northeastern region, 11 on the Pacific region, six on the Southeast, and 20 covering the States west of the Mississippi to the three Pacific coast States. It also lists and describes 212 publications covering the wild plants of individual States. There is at least one of these popular botanical publications for each of the 48 States except Rhode Island. Some cover only a county or other restricted area. There are 37 listed for California, 13 for Florida, and 10 for Texas, Illinois, New York, and Pennsylvania have eight each. The number of publications for other States runs from one to seven. Some of the publications listed are out of print, but undoubtedly they can be located in public libraries. The brief introduction is packed with lore about American flowers and facts about standard references on this subject. All efforts are directed toward making it easy for the non-commercial botanist to find information about flowers.
