New Children's TV Show Combines Entertainment With Information

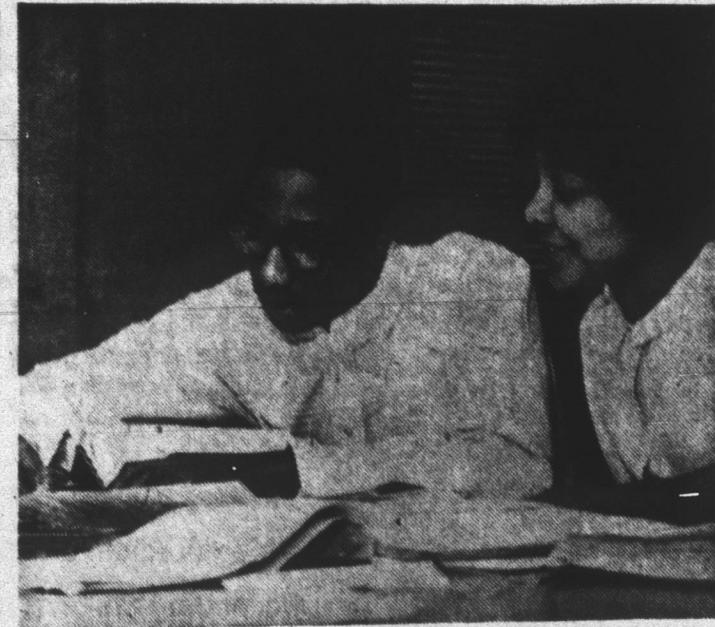

Children's television can be informative as well as entertaining. Current proof of this is "The Funny Company," a new show now being seen on local television throughout the country. Each five minute segment includes at least a minute-and-a-half sequence providing background information about an interesting subject that has been logically developed during the animated comedy portion of the show. Shown viewing the Wisenheimer, an imaginative "super computer" which is one of the many ways of introducing educational sequences, are (from left) Super Chief, Buzzer Bell, Shrinkin' Violet, Jasper N. (for National) Park, Terry Dactyl, and Belli Laguna, one of the Company's resident villains.

Head-On Collision Nemesis

Head-on collision fatalities are a thing of the past on Detroit's John C. Lodge and Edsel Ford expressways. Since 1958, when median steel beam guard rail was installed on both highways to separate traffic moving in opposite directions, there have been no head-on collision deaths due to vehicles crossing over the median. Previously six persons were killed in head-on collisions when cars crossed over the median strip. Head-on collisions cause 5,800 automobile fatalities annually. Steel median guard rail's success in stopping such accidents is spurring its use throughout the country.

A PLEASANT "CRAM" SESSION — North Carolina College biology major R. Vance Smith, a sophomore from Hackensack, N. J., probably finds assisting pretty freshman biology major Rosetta Lee, from Tomahawk, N. C., a pleasant chore. The two are studying in one of the study-seminar rooms in the college's Biology Building in preparation for the college's week-long first semester exams.

New Olympic Medal Designs

The Tokyo Olympic Organizing Committee has approved the designs for the medals to be awarded to winners of the various events at the forthcoming Tokyo Olympic Games next Fall. The designs were executed in plaster at the Osaka Mint Bureau, in accordance with the design officially determined since the Ninth Amsterdam Olympiad in 1928. The face of the medal features the words "THE 18TH OLYMPIAD, TOKYO, 1964," together with the female figure wearing an olive coronet. The reverse side (on the right) shows a young victor with a palm leaf in his hand and borne on the shoulders of nine youths.

TENDER LOVING CARE

Tender loving care is as indispensable a part of treatment at the March of Dimes Arthritis Center at La Rabida Sanitarium, Chicago, as are medicine, surgery or physical therapy. Above, Lucille Pitts, physical therapist, comforts Patricia A. Courtney, 3½ (left) and Bernice Culbertson, 2½, before the children perform special exercises for arthritis. March of Dimes programs assist 11 million Americans afflicted by arthritis diseases.

Admitted Into Honor Group

DURHAM — Mrs. Lavinia Ingram Allison, assistant professor of physical education at North Carolina College at Durham, was admitted to membership in Phi Lambda Theta, Rho chapter, a national honor society for women in education at New York University, on January 18.

Women studying in the field of education are selected for membership in Phi Lambda Theta on the basis of faculty recommendation and evidence of superior scholastic achievement, professional leadership ability, creativity, and academic excellence.

Mrs. Allison is currently on leave from North Carolina College and is studying on a doctoral program at the New York University School of Education.

She is the wife of Mr. P. V. Allison, Jr., secretary-treasurer of Durham's Mutual Savings and Loan Association. They are the parents of two children, a daughter, K. Michele, and a son, P. Vincent, III.

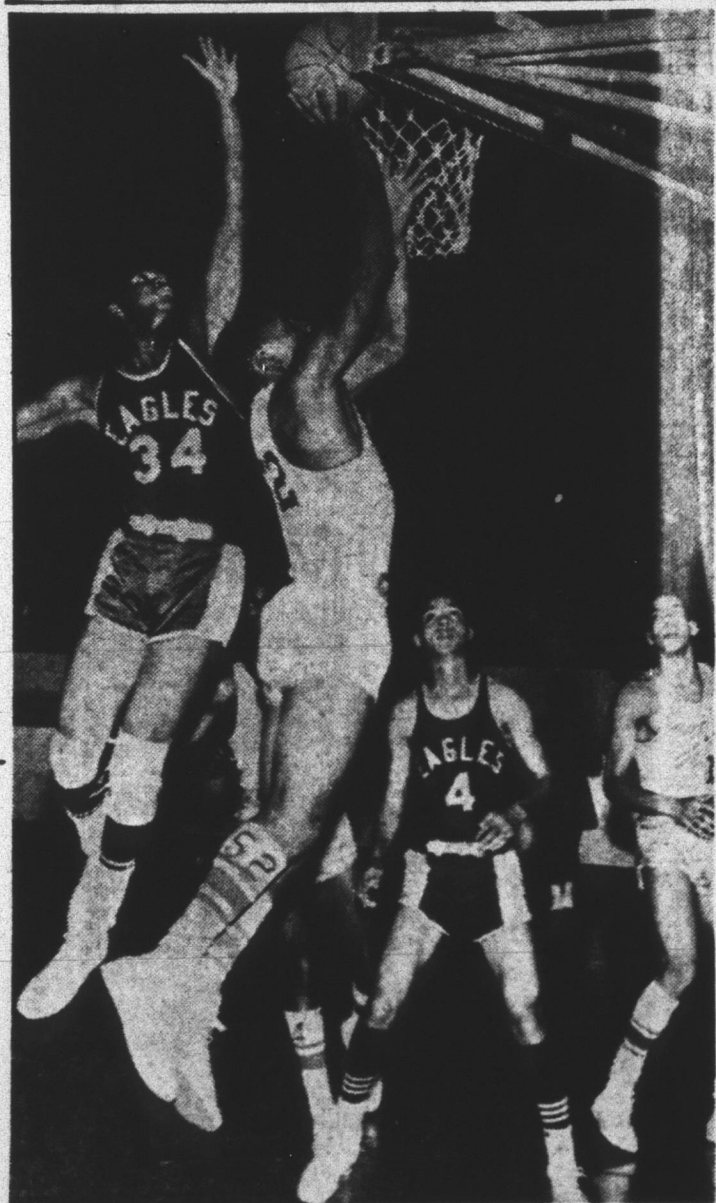

OmeGas Plan 50th Grand Conclave

DENVER, Colorado — Plans for the Fiftieth Grand Conclave of the Omega Psi Phi Fraternity scheduled to be held here August 16-20, 1964, are being carried forward rapidly according to information given Alexander Barnes, Director of Public Relations for the Fraternity on a recent visit here.

Chi Phi Chapter, headed by Dr. John Metz, is host to the meeting. William H. Pinkett is Grand Marshal and Harvey McDaniel is the District Representative.

Headquarters for the meeting is the Cosmopolitan Hotel. The hotel will also be the headquarters for all of the sessions. The "Mile High" City is leaving no stones unturned and has solicited the cooperation of the Governor, the Mayor and other outstanding persons of the state and city. The social activities bid fair to surpassing any ever staged for visiting brothers.

Visitation cards will soon be in the mail to Delegates and visiting brothers. The committee is anxious that these cards be returned as soon as possible due to the fact that Denver is a conventional city and housing arrangements must be made soon.

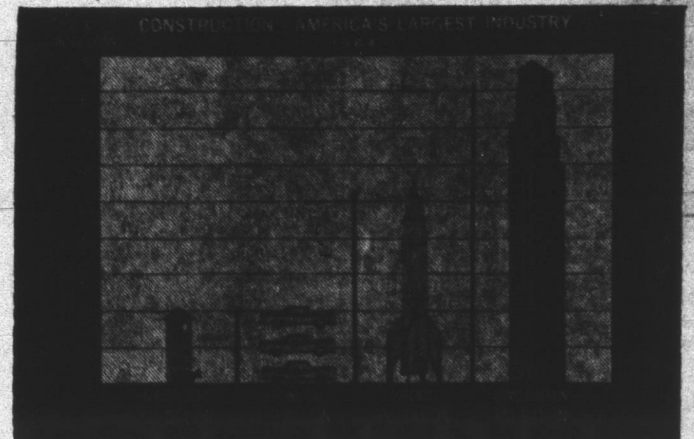

TWO-POINT LAYUP — Robert Saunders (52), guard for the A&T College Aggies, buckets a layup under the guard of Clarence Stewart (34), forward with the N. Carolina College Eagles, in an important CIAA basketball game played last week at the Greensboro Coliseum. Awaiting the rebound at left are: William Jones (4), of the Eagles, and George Mack (10), of the Aggies. A&T won the ball game, 90-81.

Agriculture will contribute \$23 billion to the gross national product — total value of all goods and services — produced in 1964. That will equal all the GNP money generated by the automotive industry which is also estimated at \$22 billion in 1964, as shown by the above chart.

National defense will account for \$55 billion GNP dollars in 1964, according to an early analysis of the construction market by Johns-Manville Corporation, world-wide manufacturer and distributor of building products. Construction, now America's largest industry, will put a whopping \$48 billion into circulation — an amount equal to one seventh of the \$615 billion gross national product forecast for the same period and very close to equalling in GNP dollar value the combined output of all three next largest industries — national defense, the automotive industry and agriculture, the J-M market analysis shows.

Farmers will spend some \$1.25 billion on farm construction of all kinds, the J-M market analysis estimates, with another \$6.7 billion going for new highways, many of which will improve road nets over which farmers get their produce to market. The J-M market analysis expects total new construction in the United States to hit \$67 billion in 1964 — a new all-time high record — with more than \$21 billion additional going for alterations, modernization, repairs and maintenance, for a total construction year of \$88 billion.

"Souls Of Black Folk" Published As Paperback

The March on Washington, the Negro boycott of buses, the lunch counter sit-ins, and the freedom riders had many roots—Gandhi's movement of passive resistance, the 1964 Supreme Court school desegregation decision, etc. But none of these has been more important, says Negro educator J. Saunders Redding, than a little book of essays published more than a half-century ago, **THE SOULS OF BLACK FOLK** by W. E. B. DuBois. Mr. Redding, who teaches at Virginia's Hampton Institute, has contributed an introduction to the book which Fawcett has published as a paperback this month.

THE SOULS OF BLACK FOLK was first published in 1903. It heralded a new approach to the Negro problem in the part of the American Negro—an approach of non-violent action which achieved its first success less than a decade ago. The book still speaks out strongly and clearly for the right of the Negro in America and everywhere to full and complete equality with his white brethren. Roy Wilkins, executive secretary of the NAACP, has called it, "One of the great books of our century. It should be read by every American who cherishes freedom." The late Dr. W. E. B. DuBois

graduated from Fisk University in 1888. Moving on to Harvard, he spent four years of graduate study in psychology, philosophy and history, following this with two years at the University of Berlin. He received his doctorate at Harvard. He later taught at Wilberforce, the University of Pennsylvania, and Atlanta University. Dr. DuBois served as an early leader in the NAACP and is the author of many books on Negro affairs.

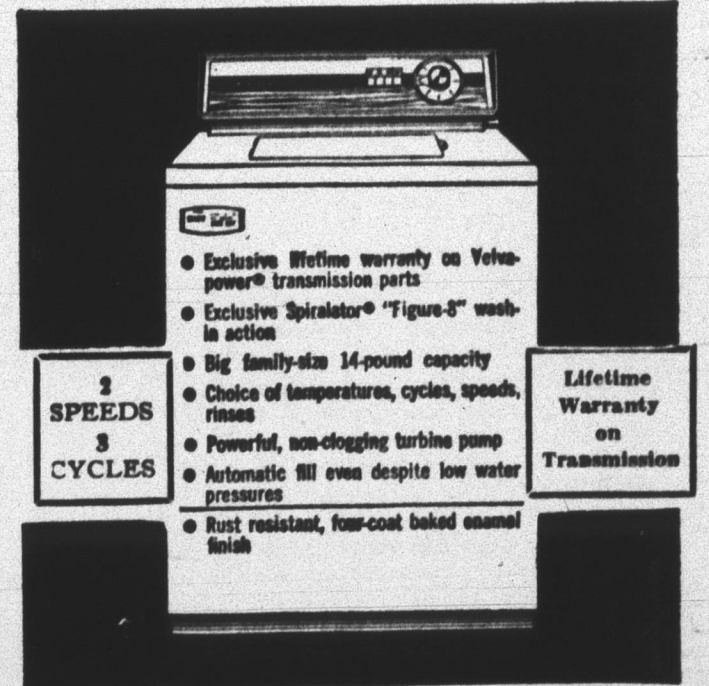

Every January since 1938 has been March of Dimes month. The 1964 March of Dimes fights birth defects, which afflict 250,000 children born each year in this country.
