L. M. Quinn, Michigan Chronicle, discussed the matter of newboys and their treatment. It was his belief that not only the boy had to be conscious of the fact that he was in business for himself, but fact that the boy was in business and that he should be instructed

that his business should be conducted on the same level as any other business.

The matter of proper service by a news service was discussed by Colonel Daniel E. Day, Washington correspondent for NNPA. He pointed to the fact that news should be printed while it was news and above all should be factual.

The highlight of the Friday session was in the afternoon. A luncheon was featured with talks given by Newbold Noyes, editor, Washington Evening Star; Dr. James Nabrit, Jr., Howard University; Robert Taylor, vice-chairman, Presidents Committee on Equal Job Opportunity and Warren W. Wiggins, acting director, Peace Corps.

Editor Noyes called upon the publishers to remember that their role was one of much importance and that their voices should eternally be that of crusading for first-class citizenship.

Dr. Nabrit challenged the publishers to take another look at the educational system and tell the nation that America's educational system had been geared to England, France and Germany. "We are now face to face with an international system that must deal with peoples whose language we do not speak, whose culture we are not acquainted and whose mores are out of step with ours," he bemoaned.

Mr. Taylor said that the publishers needed to get the message over that the opportunity was fast coming, but competent people, among our group were not available. He was disturbed over the fact that many firms and businesses were ready to hire competent Negroes, but their ability and training did not meet the requirements to land the jobs.
