the point where everyone feels free  
to breathe and smile, talk and be  
normal as the occasion demands,  
and yet be credited with enjoying  
the program.

All About  
Dogo

What's In A Name?  
Did you ever see a Basenji  
walking in the park?  
Or an Affenpinscher?  
Or a Komondor?  
No? Well, don't be too sure!  
They are all breeds of dogs that  
can currently  
be seen in this  
country, says  
Tex Fawcett  
of the Purina  
Pet Care Cen-  
ter, in St. Louis,  
Missouri.

Basenjis can  
claim to be true aristocrats  
of dogdom. Originally the companions  
of Egyptian pharaohs, they  
were worshipped in the name of  
Anubis, the dog-headed god. Basenjis  
were given special burial  
like their noble masters.

The Komondor is a highly un-  
common shepherd dog, generally  
believed to have originated in  
Thebes. He's a close relative of the  
Hungarian Kuvasz, distinguished  
guardian of nobility in  
Hungary and the Balkans.

The happy little Affenpinscher  
never guarded kings or anything  
else for that matter. These dogs  
originated in Germany during  
the 17th Century as family pets.  
The name—German for "monkey  
dog"—results from their  
monkey-like chin hair tuft and  
mustache.

There are now 113 official American  
Kennel Club breeds—about  
as many types as there are nationalities  
of men. To decide on  
the right breed for yourself,  
write for the free booklet "Se-  
lecting the Right Dog for Your  
Home," from the Purina Pet  
Care Division, Checkerboard  
Square, St. Louis 2, Missouri.

Ever dream that golf champion Tony  
Lema would be giving  
you and your wife a send-off at the  
New York World's  
Fair to go cross country in a golf car  
so you could keep a golf  
date with Bing Crosby? John  
and Jean Dray, visiting the  
Fair on their honeymoon, didn't,  
but then who knows what will  
happen if you send Bing Crosby  
a telegram challenging him to a  
head-to-head golf match.

John sent the wire after  
reading about the second annual  
"Best Bing" tournament, which  
gives amateurs the country  
over a chance to compete  
against a score posted by Bing.  
Bing agreed to the match, pro-  
vided John and his wife made  
the trip across the country in a  
golf car.

John's first problem was to  
find the right car, since most  
go only 15 miles an hour. But  
the B-M Company of St. Paul,  
sponsors of the "Best Bing"  
contest, asked Cushman Motors  
to provide a specially made

golfster golf car which travels  
at speeds up to 35 miles per  
hour—and the contest was on.

This Golfster is unique in the  
golf world. In addition to an  
18-horsepower engine, the  
three-wheel "Golfster" Ex-  
press" is equipped with head-  
lights, tail lights, signal lights,  
hydraulic brakes, a horn, a  
muffler, seat belts and a canopy  
to beat the heat.

Driving during daylight  
hours, the trip will last approx-  
imately 46 days taking the  
northern route to Chicago, then  
south through Arizona and on  
to Beverly Hills. By this time,  
John says he'll "be able to play  
Bing Crosby even up and beat  
him." His wife, Jean, has al-  
ready resigned herself to the  
life of a golf widow.

40 Days and Nights on  
The Road To "Beat Bing"

Solve a Crime  
BY  
A. C. GORDON

YOU ARE THE DETECTIVE

You are sitting at your desk studying the information you have  
managed to collect on your latest case. This case involves four hood-  
lums who had escaped from the penitentiary and on the following  
day were cornered by a group of police officers and detectives in a  
secluded farm house. One of the hoodlums was armed with a tommy  
gun, and during the ten-minute exchange of shots with the police one  
of the detectives, Jim Faxton, was killed. By use of tear gas, the po-  
lice finally succeeded in recapturing the four escapers.

You have the names of the four hoodlums written on the paper  
before you—Benny Mathews, Chris Cagle, Heinie Schmidt, and Mug-  
sy Kessel. You are especially interested in determining which one of  
the four men carried the tommy gun and killed Detective Faxton, but  
your preceding interrogation of the men failed to throw any light on  
this question. So now you are poring over the bits and pieces of in-  
formation you've managed to gather from various other sources:

One of the four men was formerly a high trapeze performer in  
circuses, has traveled throughout Europe, is able to speak four lan-  
guages other than English, and because of his dapper good looks and  
ability to appear "respectable," he originally acted as a "contact  
man" for the gang, the man who went ahead and "set up" the mu-  
rders for the big kill. Heinie Schmidt, much more crude in his man-  
ners and appearance, was extremely jealous of the contact man, con-  
stantly baited him, and the two men became involved in a number  
of verbal quarrels.

Two weeks prior to their first arrest and conviction, the contact  
man and Chris Cagle had teamed up, succeeded in luring four busi-  
nessmen to Mugsy Kessel's apartment, and there by preplanned and  
carefully worked out cheating "took" the four businessmen for more  
than \$4,000 in a poker game. Mugsy Kessel, although he loaned his  
apartment to the scheme, was absent at the time, and had never  
himself been known to indulge in any form of gambling. The con-  
tact man and the killer of Detective Faxton had been close friends  
ever since they served together in the same army outfit during World  
War II. Mugsy Kessel and the killer, prior to their first arrest, were  
partners and co-owners of a skating lodge in Canada.

Now, after adding up and weighing all these little items of in-  
formation, can you name the man who killed Detective Jim Faxton?

BEFORE YOU  
ANSWER, RE-READ THE  
CLUES. THE KILLER IS NOT HEINIE SCHMIDT, NOR IS  
MUGSY KESSEL. THEREFORE, THE KILLER MUST BE CHRIS  
CAGLE. YOU CAN READILY determine that neither Heinie Schmidt nor Chris

Tale of the Trouser

Ever since skirted Romans conquered the  
"trousered barbarians" of western Europe,  
trousers have been worn by men. Since those  
early days, they've been flared at the ankles,  
worn close, called "fights," and have been  
worn with false calves under them.

The long trouser was violently  
opposed when introduced in the early  
19th century. The "breeches-less"  
men of the French Revolution wore  
them first. Until the close of the 19th  
century it was not fashionable to  
have trousers creased. This was the  
mark of ready-made trousers that  
had lain folded on a shelf.

But times have changed, and ready-made  
slacks with sharp creases are now worn  
by the well-dressed American male. The  
latest advance is an amazing new flexible  
fabric used for Mr. Leggs' "Comflex"  
slacks. A blend of Dacron polyester, wa-  
sted and Lycra spandex, "Comflex" goes  
along with every movement, returns to  
shape smoothly and instantly, and is in-  
comparably wrinkle-resistant.

fabric used for Mr. Leggs' "Comflex"  
slacks. A blend of Dacron polyester, wa-  
sted and Lycra spandex, "Comflex" goes  
along with every movement, returns to  
shape smoothly and instantly, and is in-  
comparably wrinkle-resistant.

But times have changed, and ready-made  
slacks with sharp creases are now worn  
by the well-dressed American male. The  
latest advance is an amazing new flexible  
fabric used for Mr. Leggs' "Comflex"  
slacks. A blend of Dacron polyester, wa-  
sted and Lycra spandex, "Comflex" goes  
along with every movement, returns to  
shape smoothly and instantly, and is in-
