AFTER the republican party has ruined the financial condition of the country by bad legislation and wild extravagance for many years, leaving the U. S. Treasury bankrupt, and large and extravagant contracts made for the government to meet, which is very embarrassing to President Cleveland's administration. The organs of the republican party are daily twitting the administration about the financial condition of the country. It seems to us that it is adding insult to injury to hear these...

WHY misrepresentations should be so general in republican newspapers, as to the number of fourth class post masters appointed, when it is so easy to get the official figures, is one of those things that are difficult to understand. The republican postmasters cannot be 'fired out' too fast for the average democrat, and it would therefore when viewed through party glasses be rather creditable than otherwise to Mr. Maxwell had exceeded the record of Mr. Clarkson in putting in republicans four years ago, but he has not come up to that record by a long shot, as will be seen from the figures below.

THE ladies in Chicago who have charge of the Women's Department of the World's Fair, have gotten into a row over the honors. Mrs. Palmer threatens to resign if the row does not subside. It is now given out that the World's Fair will remain open on Sundays, notwithstanding the many protests against it by nearly all the religious people. One dollar pays for the Democrat one year.

The papers give many instances in Ohio and Illinois where the Catholic priests are having Winchester rifles shipped secretly to them in large quantities. Some authorities say that the Catholics have over 700,000 who will do the bidding of their priests. When we consider that there are thousands of the Jesuit Catholics arriving at our shores every month from all parts of the world, many of them being Anarchists of the worst type, and a great majority of them opposed to our political institutions; un-American in their dispositions, and often in their actions, and then when we consider that thousands of our own people more or less under the influence of this Catholic element, there are reasons for us to be warned of coming danger. If matters continue for ten or twenty years longer on this line there may be grave consequences awaiting the American people.

"ALL men are born free and equal," says our bill of rights. This is true so far as applied to men's right under the law. Legally, men are equal. All have the same rights under the law for protection of life, liberty and the pursuit of happiness. In many other respects men are not born equal. This is very evident in regard to the mental, moral and physical conditions of men. Neither is it true in man's social, moral, and religious conditions, and as regards beauty and elegant form, there is a vast difference; no equality about it. When we see handsome and homely men together we are sure they were not borne equal in this respect. So we are led to the conclusion that our old fathers who framed the bill of rights that we all so much admire and refer to so often, only meant a legal application of it. We believe that many men are born in every other respect inferior to their fellow-men so far as it applies to this life.

THERE is a great turmoil going on in Cuba and things have become serious in that land of sugar and other sweetness. It is hard to tell how matters will terminate.

THE President speaks of the World's Fair in the highest terms, and says it is a great success.

People should not be deceived into paying money for trashy mixtures gotten up to sell. Botanic Blood Balm, (B. B. B.) which has been made in Atlanta for the past fifteen years, never fails to give satisfaction as a superior building up tonic and blood purifier. It is made from the prescription of an eminent physician. The bottle is large and the doses small. See their advertisements and buy that which is thoroughly endorsed by thousands of grateful patients whom it has cured. A trial bottle will test its merits.

A Swing Around the Circle

It is always a pleasure to visit our friends, go to their houses, exchange ideas hoping to interest them and at the same time being benefited ourselves. Such has been the experience of him who is writing this letter.

Last Friday, Saturday and Sunday the Baptist Union Sunday School was in session at the Globe, and quite a crowd gathered to witness the occasion. On Friday and Saturday the sun shone brightly, and every leaf, twig and flower seemed to enjoy the sunlight of heaven. The Johns River, as it glided by was singing a song of welcome that was heard by all. And, indeed, everything was just ripe for a most enjoyable time.

The Convention was organized with Joe Powell as Moderator and Joe Howell as Clerk, (both of Lenoir.) The business was all carried out nicely, quite a number of questions being discussed concerning Sunday Schools. I don't remember at any time to see young men take such an active part as they did at the Globe. They were ready to speak on any question and, by so doing, kept up life and interest all the while.

As they always do, the people opened their doors widely, and did everything to accommodate the visitors. We were entertained and well entertained. Globe heretofore has enjoyed the honor of being the Athens of Western N. C., for she has one of the best academic schools in the State, and the people to-day are more enthusiastic over the school than ever before. They are to employ a teacher right at once, and the work will begin early in the fall. No better place can be found for a school. No community will throw more religious influences around the young than Globe.

I well remember when I was a student there, when my room-mate and myself went back into our room, and looked around and about, seeing an old hat here, a pair of breeches there which were worn in days that had gone by. I could not but think of olden times when we called each other "old lady." Then I was proud of the privilege of being back again to a place which has such a pleasant history to me. When we were school boys; we had Arbor day. We went out into the mountains and got some nice maple trees and set them in the campus. They are there yet, growing bravely, and as I opened my knife to take off some useless limbs, I thought of those words: "Woodman, spare that tree."

But why should we dream of the past or build air castles for the future? No man can live only at the present. So, after all, there may be some argument in the old saying: "Let every day provide for itself."

He who lives well to-day, will have lived a noble life. He who works tomorrow, should never be tired.

Strongly Endorsed. The advertising of Hood's Sarsaparilla appeals to the sober, common sense of thinking people, because it is true; and it is always fully substantiated by endorsement which in the financial world would be accepted without a moment's hesitation. They tell the story—Hood's cures. Hood's Pills cure liverills, jaundice, biliousness, sick head ache, and constipation.

B. B. B. BOTANIC BLOOD BALM. A thoroughly tested remedy for all BLOOD and SKIN DISEASES.
