

One-Sided Prosperity.

Lexington Dispatch. A manufacturer who is getting the very same price he got for his goods seven years ago, was talking with a Dispatch man the other day and gave the following comparative prices. Flour, then, \$1.50, now, \$3.75; meat 6, now 12 cents; mixing 80, now \$1.80; corn 35, now 95 cents per bushel. Meanwhile wages has increased about 25 or 30 percent. Everything that the workingman or the manufacturer has to buy has increased in price, while the price of labor and of the manufactured article is almost the same, especially the price of labor, for a few manufactured articles have gone up. Our prosperity—the prosperity we did have—has been entirely one-sided. But they can't let it prosper and the Republicans are in power and the tariff is high and going higher. Something is wrong in our scheme of things when a man who made a dollar a day seven years ago makes a dollar or a dollar and a quarter a day now and pays more than twice what he paid seven years ago for his rations. This may be prosperity but it doesn't look good to us.

Yellow Jackets in Church.

A great revival meeting in Pittsburg, Ga., at the Baptist Church there was broken up Sunday by the swarming of yellow jackets which had built nests back of the pulpit. The services were at high tension, the preacher being engaged in calling sinners to the mourners' bench, when the yellow jackets began to dart out from their nests and sting sinners and sinners alike. In a few minutes there seemed to be thousands of the yellow insects flying about the church and darting their stingers into the brethren and sisters. The preacher was one of the first to be stung and the pain put a stop to his exhortation. The women screamed when struck by the yellow jackets and many of them said things that had no churchly sound. After standing for the stinging a few minutes, the congregation got into a panic and bolted from the church, leaving the sacred edifice in possession of the yellow jackets.

Utilizing Saw Dust for Roads.

They are making roads of sawdust mixed with earth on a new plan in Leon county, Florida. Two ridges of earth are thrown up with a road machine at the required width from each other and the space is filled with a six inch bed of saw dust. This is followed with a smaller machine, which plops up and mixes the earth with the sawdust. This makes a roadbed on which the heaviest loaded vehicles make no impression. The contractor, Mr. G. H. Averitt, has kept an accurate account of expenses in connection with this section of earth road, and says the cost aggregates \$297 a mile, showing it to be the cheapest road material in use. It may be suggested is not a durable material, but the True Democrat meets this objection with the statement that one or two such roads were constructed in the South Georgia country in twenty years ago and are still in good condition, showing its durability. As is well known, Leon county soil is clayey.—Ex.

The Dispatch tells of a citizen of Davidson county, a former Republican, who has turned Socialist. "The old parties are no good," says the new convert. "The Republicans took our bread away and the Democrats took our booze," continued the Davidson man, and "my party that takes my rations and liker from me won't git my vote no more." There now.—Landmark.

See deed registered in Watauga county in Book No. 4, at page 224. The tracts will be sold separately and a deposit of ten per cent of the amount bid must be made with the Clerk of the Superior Court on day of sale. Sale is made for the purpose of making partition between the several heirs at law and widow of Newton Moore, deceased. This June 5, 1909. MARK SQUIRES, Commissioner.

The Fatale of Children.

Are you a father? Then take time to be a father. Are you a mother? Then take time to be a mother. No enterprise can be so desecrating as to enter a child's life and to justify the neglect of your children.

You busy, do you say, to have a share in the rearing of your family. You have no more moral right to be a father if you cannot find time to do the work of a father than you have to be an alderman if you cannot find time to do the work of an alderman. Many a father spends more time on his saddle horse or his automobile than he does on his boy; and yet he expects that boy to be a credit to him. That father makes a serious mistake who will not take time to be a companion to his boy.

Do you want to save your boy your girl? Then make home the dearest spot on earth. Make it just as cheerful and attractive as you can—not for the occasional guest, but for the boy and girl.—Home Life.

NOTICE TO FARMERS.

To whom it may concern: The farmers of this county have been waiting a combination horse. I have recently purchased a Belgians bred Favey Bay Stallion—a fine saddle and driving horse. He is a rich dark bay, and weighs 1,220 pounds—eight years old, and nineteenth of his foals are dark bays and have good saddle gates. The farmers of this mountain section could do no better than to breed to this horse. Come and see him. He will stand at the following places:

How to Prevent, How to Cure Consumption.

The National Association for the Study and Prevention of Tuberculosis is making publicity one of the features of its campaign. It is soliciting co-operation of the leading newspapers and magazines of the country, thereby to acquaint the public with its health rules and results of various experiments it is undertaking from time to time. The association has just issued a schedule of rules which, if followed, it is believed will prevent and cure consumption. These rules are:

Tuberculosis is a communicable disease. Tuberculosis is a curable disease. Tuberculosis is a preventable disease. If you have a steady cough, go to a doctor. Don't waste your money on reputed cures. Don't give consumption to others.

Don't let others give consumption to you. Don't spit on sidewalks; it spreads disease. Don't spit on the floor of your shop. When you spit, spit in the gutter, or into a spittoon. Have your own spittoon half full of water and clean them out at least once a day with hot water.

Don't cough without holding a handkerchief or your hand over your mouth. Don't live in rooms where there is no fresh air. Don't work in rooms where there is no fresh air. Keep at least one window open in your bedroom day and night. Fresh air helps to kill the consumption germ. Fresh air helps to keep you strong and healthy.
