

Registration Day in Boone.

Registration Day in Boone was one long to be remembered by the people of the village and the entire township. The young men began gathering at an early hour and by noon the larger part of them had their names recorded, two assistants to the registrar being necessary to accommodate the anxiously waiting crowd. If there was a single one of proper age who failed to register, it is yet unknown to the officials, and it is confidently believed that not one has even tried to evade the orders sent out from Washington. The heat of humor prevailed throughout the day, and a more determined looking or handsomer set of soldier boys could scarcely be found. Following is the list, and we hope to get the lists from the entire county just as soon as possible, for it is indeed a pleasure to publish the names of those who have so willingly tendered their services to their beloved country:

Training School Items.

The First Term of the Summer School opened on Wednesday, the work starting off as though it had been running for weeks or months. The school has never started off better or with a more earnest body of students. Of course the preparation for enlisting the young men for the war has made the number of boys smaller.

Prof. D. D. Dougherty, Brown, and Hartzog, and the Misses Reid, Stanbury, and Matney, of the regular faculty are not teaching in the 1st term. The new teachers for this term are Dr. and Mrs. Randolph of Elon College, Miss Taylor of Raleigh, Miss Mary Porter, of Greensboro College for Women, and Miss Mary Witherspoon, of South Carolina.

Outings to Winkler's Creek were enjoyed by the girls in company with teachers on Saturday and Monday. Also one to Newland heights on Monday afternoon. Plans have been made for the young ladies especially to take these hikes each afternoon.

A social hour was given to the student body on Saturday evening.

Dr. Davis, of the Long Sanatorium, Statesville, N. C., spent a while looking over the School on Monday afternoon.

On Monday evening there was held in the auditorium one of the most interesting and enthusiastic meetings that we have attended. It was a prayer service especially in behalf of the boys who were to register on Tuesday. It assumed the nature of a highly religious and patriotic meeting. Prayer was offered by Rev. Adams, and talks were made by Rev. Waters, Prof. B. B. Dougherty, Miss Butler, and Hon. F. A. Linney. These talks were in their order on our religious duty for the hour, our patriotic duty, the duty of the women, and why we are in the war and what we are fighting for. All were full of high feeling, instruction and enthusiasm.

Quiescent Submarines.

Mr. Root and his commission have reached Russia safely; the Italian delegation had no trouble at all in coming over, nor the French and English in coming and returning, and the Russian party is now on the way. Meanwhile the mail from England comes as regularly as it does from Washington—and we wonder if the explanation of it all is in the fact that there are American men and American ships over there? The submarine does not appear to be the same brag-gart as of old. It would be mighty interesting to know what has happened and what is going on over there. What were once called ocean lanes seem now to have broadened into ocean highways. We do not believe the quietness has been put upon the submarines—on the contrary we are likely to hear much more from them, but they have become comfortably quiescent.—Observer.

Take The Loan.

By Edward Everett Hale  
Come, freedom of the land  
Come, meet the great demand,  
True heart and open hand,  
Take the loan!  
For the hopes the prophets saw,  
For the sword your brothers draw,  
For liberty and law,  
Take the loan!

Ye ladies of the land,  
As ye love the gallant band,  
Who have drawn a soldier's brand,  
Take the loan!  
Who would bring 'em what she could  
Who would give the soldier food,  
Who would staunch brother's blood,  
Take the loan!

All who saw her hosts pass by,  
All who joined the parting cry,  
When we bade them do or die,  
Take the loan!  
As ye wished their triumph then,  
As ye hope to meet again,  
And to meet their gaze as men,  
Take the loan!

Who could press the great appeal  
Of our ranks of serried steel,  
Put your shoulders to the wheel,  
Take the loan!  
That our prayers in truth may rise,  
Which we press with streaming eyes  
On the Lord of earth and skies,  
Take the loan!

The Dog and the War Tax.

The Observer has informed its readers from Washington that Congressman Doughton has assumed up courage to lay before Senator Simmons, chairman of the Finance Committee, a proposition to add considerably to the sum of the American war revenue by imposing a tax on dogs. Mr. Doughton has been reading about the ravages on sheep folds by dogs—and in fact he has much personal knowledge on the same subject, and this is one of the reasons he will make bold to ask for a dog tax. Mr. Doughton, in answer to inquiries by The Observer, stated that Ashe is the largest sheep-growing county in North Carolina. Wool is now bringing sixty-five cents a pound or more than eighty per cent over last year's prices. Spring lamb is bringing fourteen cents a pound, or nearly double last year's price. The average lamb weighs eighty pounds, so it is easy to calculate the present value of a herd of sheep to a farmer. Mr. Doughton says every farmer ought to have at least twenty sheep. He can buy the stock one year and next season will be reaping the benefit in high priced wool and mutton. Mr. Doughton says the sheep industry will automatically develop itself in North Carolina if the dogs were once got under control. The famous woolen mills at Elkin buy its wool entirely from eastern and western North Carolina farmers and from Georgia, and this mill affords a market for all the wool the State could produce. But for that matter, wool is in demand by manufacturers all over the country and there is nothing surer or more profitable. But would it not be great to see the war catch the dog in a tax net? Great Majestic

The economy of the best range

Every bread-baking that falls; every cake that fails; adds to the excessive cost of a cheap range. The range that will produce the best results is the most economical.  
The Majestic gets sure baking results because the heating is distributed evenly over all parts of the oven, and is reflected onto the baking by the asbestos lining, thus baking evenly without turning. Sure baking means economy of both fuel and fuel.  
The heat cannot escape because the oven is better riveted and requires no putty. Heat being retained, less fuel is needed to maintain even baking temperature. Better baking with less fuel, is double economy.  
The Majestic is made of malleable iron for strength and charcoal iron for rust-resisting strength. A combination that cuts repair bills and substitutes long service. Preparing better food, with less waste, and less fuel and lower repairs, over a long period of years, is double economy, that makes the little extra you pay for Majestic quality and service seem but dividends.  
The Majestic has many improvements that lighten the labor of cooking and add to its certainty. Five minutes examination of a Majestic will tell you more than any number of words. You ought to see the Majestic.

Call at our store real soon and give us the privilege of demonstrating the many Majestic advantages.
