**TRAINING SCHOOL ITEMS**

A base ball game on Saturday between Boone and Beaver Dam resulted in a score of 8 to 16 in favor of the latter.

Mr. E. L. Mays, superintendent of roads, is in Boone laying plans to begin hardsurfacing the Boone Trail Highway just as soon as he can secure his machinery. This is good news for Boone and all this section.

The Fourth Quarterly Meeting for the Boone charge of the M. E. Church, South, was held during the past Sunday and Monday and Monday, the quarterly Conference on Sunday evening, after a most effective short sermon by the Presiding Elder, Rev. J. W. Williams, was one of the most largely attended ever seen in Boone, not only by the officials but by a large number of others as well. The reports were all encouraging.

The Fall term of the Training School has finished its first two weeks, and the enrollment is unusually good for so early in the term, the number being considerably larger than last year and they are still coming in. The new teachers now in are Prof. Smith, of the Science Department; Miss Townsend, assistant in first year teacher of Modern Languages; Miss Has'till, head of the Department of Domestic Economy, and Miss Emma Lemley, assistant in the latter department. The teacher of Pedagogy is expected in within a very few days. Prof. J. D. Rankin, who has done such splendid work during the past two summers in the summer schools, now takes the English Department as a regular teacher. The work is starting off unusually well.

J. M. DOWNUM.

**Woman's Missionary Union Program**

Following is the program of the 8th annual meeting of the W. M. U. of the Three Forks Association to be held with the Beaver Dam Church Sept. 10, beginning at 10 a. m.:

**THE LEOLA LUCEY CONCERT**

Miss Leola Lucey well known soprano, and one of Broadway's most popular light opera stars, will be heard in an unique concert at the auditorium of the Appalachian Training School on September 17th. Assisting Miss Lucey on this occasion will be Adrien Friche, violinist, pupil of the great master, Leopold Auer, and Raymond Barry, the brilliant young pianist.

While still very young, Miss Lucey showed an exceptional talent for singing, which she put to use at her first opportunity. Her musical career began in New York, where she was first engaged as a chorus girl. This was followed by several seasons of hard work in some of the biggest musical successes on the road, during which time she worked and studied and denied herself all the pleasures which are supposed to be a part of the life of a chorus girl.

During her first season on the road, Miss Lucey's ability was quickly recognized, and she was made understudy to Annabelle Whitford in a prominent musical show. This was her opportunity to get the training she so much desired, and when she returned to New York she found herself a full fledged star.

In the coming recital, Miss Lucey will sing in comparison with her voice as RE-CREATED by the New Edison, to enable those in the audience to judge whether the living voice can be made to live forever. A superb program has been arranged—a program that will reveal all the fascinating qualities of the glorious young soprano. At times her living voice will be heard alone; at times she will sing in unison with the RE-CREATED voice; at other times she will sing duets with herself. The audience will try to pick the two golden threads of tone apart—to say which one lives for a moment and which one has been made immortal. Can it be done? Cards of admittance can be secured from Greene & Bingham if you wish to hear this question answered.—Adv.

**NOTICE.**

By virtue of the power of sale contained in a certain mortgage deed which was executed on the 12th day of May 1920 by V. M. Pressnell and Minnie Pressnell his wife to me for the sum of One Thousand Dollars with interest on the same from date of execution until paid, I will on the 10th DAY OF OCTOBER 1921 between the hours of 10 a. m. and 2 p. m. at the court house door in Boone, Watauga county, sell to the highest bidder for cash the following piece or parcel of land lying and being in Watauga county, North Carolina and known and designated as follows, viz: Beginning on T. L. Mast's corner in D. S. Foxes' line and runs S 8 degrees W 39 poles to a cherry tree on the bank of the mill race, then south 30 degrees E with said race 9 poles to school lot I L Mast's corner thence with mill race to bridge in public road, thence down said road 34 poles to a stake near a walnut, thence a north course 10 poles to a white oak on north bank of mill race near where the water enters the boxes that run to mill wheel, and thence a S W course 5 poles to a beechwood, G. W. Moody's corner, hence north crossing a branch 24 poles to a maple, thence north 20 degrees E 30 poles to a stake, thence N 13 d W 1 poles to a stake in D. S. Foxes' line thence E 16 poles to a beech D. S. Foxes' corner, thence with D. S. Foxes' line to the beginning, containing 12 acres more or less. With this exception of Right of Way for water to run mill.

For complete description of the land above described, reference is hereby made to book "U" page 498 in the Register's office of Watauga county, North Carolina.  
This 8th day of September 1921.  
JENNIE JENKINS, Mortgagee.

**Filling the Silo.**

Now that the time has come for filling the silo, there are certain precautions that need to be taken. In erecting the blow-pipe see that all ladders and scaffolding are made secure before any one goes aloft. Be sure there are no sticks, stones or pieces of iron in the bundles of corn, for these will surely wreck the machine and may injure some of the workmen.

Those who feed the machine must be sure to keep the hands a good way from the knives. Many a man has lost his hand in an ensilage cutter. Carbon dioxide gas often forms in partly filled silos, and if deep enough will smother any one going into the silo. To prevent this have the doors out below a man's head and do not go or send any one into the silo until after the blower is started. Keep the children out of the silo at filling time. The proper time to put corn into the silo is just when the kernels begin to dent. At this stage it has its greatest weight and feeding value. No water will be needed if the corn is put in at this stage. In fact no water will be needed at any time if half the blades are green. An excess of water causes the silage to develop too much acid and is a detriment. Assistance in building, and suggestions relative to filling gladly given free of charge.

J. A. CONOVER.

Boone, N. C.

**TWENTY-FIVE DOLLARS REWARD.**

I will pay \$25.00 reward for the arrest and sufficient evidence to convict the party or parties who burned my cattle barn on the Hessian, Aug. 25. This Sept. 6, 1921. R. H. Sutherland, Trade, Tennessee.
