To all these services we cordially invite the public.
 J. A. YOUNT, Pastor

TIPS FOR MOTORISTS
 Look at the water that comes from the radiator when you drain it. If oil is present it indicates a leak between the compression chamber and the water jacket. In addition to loss of power, this may result in the blow-out of a cylinder head gasket.

Keep an eye on your fan belt and water pump. Unless they are in good condition and properly adjusted, your engine will not cool satisfactorily.

If you run out of gas on the road, sediment may be sucked into the feed line from the bottom of the tank. This will prevent a free flow of fuel to the motor when you fill

the tank again. The engine will sputter and miss. In such a case, try to struggle to the top of a hill and coast down the other side with the ignition on. In all probability, the feed line will be sucked clear of dirt and the motor will run smoothly thereafter.

Good advice is sometimes negative—so, unless you really are an expert, don't monkey with your carburetor. If it goes wrong, have a mechanic look at it. But before blaming it for the trouble, examine your spark plugs, distributor points, battery terminals and gas line for dirt or disorder.

When you suddenly find yourself

rushing to a bad hole in the road, don't jam on your brakes—unless you have time to reduce your speed and release the brakes before you hit the hole. If you take it at high speed with the brakes on, the result will be a broken spring.

Campers often find the pieces from the tool kit useful for lifting hot pots and pans—but don't leave them lying on the ground when you start out the next morning.

If a fuse blows out and you have neglected to provide yourself with an extra one, wrap a piece of tinfoil around the blown-out member. It will work that way for a while—but get a new fuse as soon as possible.

A package of cigarettes, a bar of chocolate or a cake of yeast will furnish the tinfoil.

When an engine is new and stiff it heats up more rapidly than when it is thoroughly broken in. Therefore, watch the water in the radiator, and oil in the crankcase, when you drive the 1929 model for which you traded Old Faithful.

Under-inflation of tires materially increases the consumption of gas and oil. Soft tires impart a rolling motion to the car that makes resistance for the engine to overcome. Therefore it needs more fuel and lubrication.

SAYS SIMMONS WILL HAVE OPPOSITION IN PRIMARY

Tom Bost, Raleigh correspondent of the Greensboro Daily news, quotes Josiah William Bailey as saying Senator F. M. Simmons will have opposition for re-nomination in the Democratic primary next June. Just who the opposing candidate will be is not given out, but it is expected that either Bailey or Chief Justice Stacey of the supreme court, will seek the nomination.

Parenthood has reached first base when it recognizes from the sound whether its progeny is crying for cause or effect.—Dallas News.

Closing Out Under Cost

Our GREAT REMOVAL SALE will close Saturday Night October 5th

The unquestioned success of our Removal Sale is attributed wholly to the fine co-operation on the part of our many friends and customers in this and other counties, who have been eager to supply their wants with the high class merchandise which we are offering at **LESS THAN WHOLESALE COST**. We assure our friends that the remaining values are just as enticing as they were on the opening day, as we have no old or shelf-worn merchandise. The selling is brisk and the stock can't last long, so avail yourselves of the opportunity **NOW**.
