HEALTH . . . and age.

Worrying about one's health is, usually, a sign of advancing age. I used to do a lot of it, until I got old en-ough to realize that the human machine, like any other machine, needs only regular, normal care to keep it in good running order until it wears

The best way to keep well, after one reaches middle age, is to be lazy. I make it a rule now, in the sixties to indulge in any physical exertion that I can avoid. Of course when you're not running the engine can keep on half the food he used to consume, if he doesnt' throw his weight about and burn us his

Chouncey Depew, who lived to be 93, remarked once that all the exercise he ever took was walking to the funerals of his golf-ploying friends. I wide interest have found their way gave up golf ten years ago. Five men into the hoppers, but local bills are that I used to play with, all younger flowing in at the usual rate. than I, have since dropped dead on the golf course.

PICTURES . . . they improve

I am not the world's most enthusiastic motion picture fan, but I find Representative Swift has been myself going to the pictures oftener isfaction out of them.

It seems perfectly clear to me that there has been a great improvement in the films in the past year or so Better stories, better acting, better stage effects, better sound reproductions. I find much less that is offensive to my sense of good taste and decency than I used to, less of the sort of thing that is apparently aimed at the lowest mental and moral types.

No greater mistake can be nade together, in which he painted a vivid

dy who seeks to entertain of instruct people than to underestimate their capacity for discriminating between good and bad. No newspaper ever succeeded whose editor thought it necessary to "play down" to the supposed low level of his readers' in-

It looks to me as if the mation picture respie had discovered that the ties, such as work for increased pric best they can offer is not too good es for tobacco, cotton, potatoes, peafor their audiences. They have also guts and other farm products. Rigid discovered that it is not necessary to economy was necessary two years be dull to be decent

### HISTORY . . . good teacher

A, friend who is in charge of the historical collection in a great libra-tion. ry tells me that more young folk are coming in for information about the things that have happened in the past then ever before.

That is a good sign. Once one understands that nothing that occure today is without its parallel in the past, the better he is able to judge of the value of new experiments to change the social order. The realiza-tion that human nature is unchangeable is the chief lesson of history.

I have been reading lately the accounts of the great speculative era in England and France in 1720 and thereabout. A precise parallel to the speculative era in the United States from 1926 to 1929 is found in the history of the South Sea Bubble in England and the Mississippi Bubble in France. Everybody was speculating, everybody lost, tens of thousands were ruined and the bottom seemed to have dropped out of everything.

But somehow, civilization continued to develop and the world kept on run-

#### COTTON . . , and Calico

Two hundred years ago the flaxgrowers and sheep herders of England absentee ballot law or its repeal; sepwere greatly concerned for the future arate primary registrations to preof the wool and linen industries. Gaily printed cotton cloth was being imported from India-from "Calicut," whence we get the word "calico." Women were discarding wool and linen inating this social evil. to wear the new fabric.

Laws were passed forbidding the importation of calicoes. They resulted only in extensive smuggling. Final. and study of plans for old age penly Parliament passed a law prohibiting the wearing of cotton garments. That didn't work, for it was impossible to send to prison all the womenfolk who persisted in flaunting their calicoes in public

The outcome was that England began to import raw cotton and spin and weave it in its own factories, and encouraged the growing of octton in its American colonies.

Now we grow more cotton than the world will consume. A lot of other people have found out that they can grow and weave cotton. Women are wearing more rayon, made from wood pulp, and less cotton. The English cotton mills are in distress and so are our cotton growers. No manmade laws will cure the situation.

Yet, somehow, the world will wag on. It always has.

Mrs. J. F. Hardin went to Asheville Sunday where she will take treatment at Biltmore Hospital for an ailment which has kept her confined for some time. Friends or the popular lady will be pleased to note that her condition is showing great Councill and Mayor Tracy Councill. | dially invited to hear him.

### GOVERNOR'S MESSAGE

Raleigh, N. C.-Increased salaries for all State employees, including salaries, was recommended Thursday biennial message to the General No greater mistake can be nade picture of the emergencies of this State from the darkness of early 1933, from bank closings, farm and foreclosures and depressed spirits, into a condition of security and a long step along the road to a easonable prosperity.

He gave an accounting of his stewardship, mentioning outside activieconomy was necessary two years ago, requiring salary cutting which in the face of the recovery progress is distressing, and this must be remedied in a long forward step toward pre-depression levels, but with cau-

Governor Ehringhaus lauded the 1933 session for its forward step in taking over schools and providing a State-wide eight-months term to all children, rural and urban, black and white, increasing the term even tho' every other State reduced it. He dissented from the view that school sen-timent prevailed to raid the high way fund and reaffirmed his opposi tion to diversion. He expressed the adopted sooner, and later free textbooks.

Saving he would have later rec ommendations on specific problems, ne suggested legislation at this time, briefly stated, as follows:

Highways: Funds for construction of rural roads, in addition to matching Federal funds, complete maintenance funds, and taking over the Cape Fear and Chowan river bridges, mak ing them toll free.

Safety: Drivers' license, not for re-

vent breaking over of party lines.

Child Labor: Adoption of proposed amendment to U. S. Constitution, placing all states on even basis in elim-Unemployment Insurance: Enact-

ment of laws conforming to Federal legislation to be enacted by Congress

Workmen's Compensation: Extendng law to cover occupational diseases, including teachers, within the law, and State insurance fund, if ne-

Employment: Provision for continuing on 50-50 basis Federal employment plans, and legal machinery to adjust labor and industrial disputes.

Veterans Loan Fund: Laws for the proper administration and protection of fund and interests of all veterans. Amendments: Provision for adopt ing some, if not all, of constitutional changes embraced in plan not submitted last fall, due to a court decision, especially liberalizing the tax ownership, the latter, because ownership of humble homes is really pen-

alized. A study is urged. Charities and Welfare: Commends recommendations of the commis-

## AROUND THEM SWIRLS THE DRAMA OF THE LINDBERG CASE

these characters swing the most dramatic court scenes this nation has witnessed in years. It is the trial of Brune Hauptmann on the charge of murdering the Lindbergh baby. Upper left are character studies of the accused man. Upper right is Justice Thomas W. Trenchard, 71, who is presiding at the trial. Belew is the Hauptmann jury.

The trial of Richard Bruno Hauptmann, charged with the slaying of the Lindbergh baby in March, 1932, continues, with the State weaving what appears to be a constantly strengthened net around the German carpenter. The last few days have been spent targely in the testimony of handwriting experts, who were positive in their identification of the writing found on the

ransom notes as that of Hauptmann. Meantime, no hint is given as to the line of derense which will be offered. Chief counsel for Hauptmann does state, however, that it is probable his evidence will require three weeks. Hauptmann has been positively identified three or four times during the trial by State witness declare he is the man who negotiated the huge ransom.

## PIONEER BOONE WOMAN, AGE 102 DIES THURSDAY

Mrs. Alice Councill Succumbs at Hickory Home, Body Interred in Local Cemetery, Native of South Carolina and Widow of Late Dr. William Councill of Booge. Two Sons and One Daughter Survive.

Mrs. Alice M. Councill, pioneer resident of Boone, died at her home in-Hickory last Thursday evening, at the remarkable age of 192 years. Mrs. Councill had been ill for several weeks and a constantly weakened condition brought about her demise.

Mrs. Councill on last December 1st beeved her 102nd anniversary and the day was spent with only members of the immediate family present. Until recent weeks she had been in resarkably good health and returned to Hickory in the late fall from Blowing Rock, where for many years she had spent the summers with her grandson, Mr. Donold J. Boyden. During the past summer many of the older residents of the county called on the estcemed lady, and were greeted with the same cheery smile and ready conversation, which had been theirs in the associations of many years ago. Until the end, it is said, Mrs. Countill retained her mental faculties, her keen recollection was not dimmed, and through newspaper reading she enjoyed keeping informed of the events in the rapidly changing world,

Funeral services for Mrs. Councill vere conducted at the residence of Mrs. Taylor Saturday morning at 11 by Rev E. F. Heald and Rev. Sam B. Stroup, and at 2 o'clock the body tery, where the deceased had resided for many years.

Native of South Carolina

Mrs. Councill was born in Sumter, S. C. December 31st, 1832, the for-mer Alice Martin Bostwick, she was a daughter of Mr. and Mrs. Jefferson Bostwick, prominent members of old Southern families. Andrew Jackon occupied the White House at the time of her birth. She lived through four wars, the Mexican War, the Civil War, the Spanish-American World wars, and to each conflict she contributed members of her family.

Mrs. Bostwick began her schooling In a little schoolhouse on a South Car-olina plantation, later attended school at Sumter and at the age of 14 entered Salem College, Winston-Salem, being at the time of her death the oldest alumna of that institution. While at Salem she pursued the regular course of study with music and voice training. She was regarded as an outstanding musician and kept up with her music during her entire life. At Salem Mrs. Councill became a close friend of Anna Morrison, who later became the wife of Stonewall Jack-

On June 7, 1852, Alice Martin Bostwick became the bride of Dr. William Bowers Councill of Boone. After livng here for a few years, they moved back to their plantation where they located at the outbreak of the War Between the States, Dr. Councill organized his own company and entered the service of the Confederacy as a captain.

Located in Boone at End of War When hostilities ceased Dr. Mrs. Councill returned to Beone where Dr. Councill resumed his practice of tor in her husband's work, and often made medicines in his office, according to his instructions, and administered them to the sick. At the same time Mrs. Councill adjusted herself The Woodcraft Noveity Company in an admirable fashion to life in and was loved by the mountain peo-ple throughout her long life.

Surviving are three challdren: Mrs. Emma A. Taylor, Hickory; Judge W B. Councill, Hickory; L. L. Councill, Waynesville. A number of grandchildren and several great-grandchildren also survive.
