IT'S A RACE IN NEW YORK STATE

Until Governor Herbert H. Lehman consented to run again for chief executive of New York state it looked very much as if Thomas E. Dewey, youthful and successful prosecutor of racketeers, would romp away with election to that office on the Republican ticket over any candidate the Democrats would be able to find.

General Robert G. Dyrenforth carried a bullet he received in a Civil War engagement in his body for more than thirty years. He was wounded in the chest, and I removed the bullet from the calf of his leg.

An elderly murderer, recently executed in Sing Sing for years had been swallowing pins and needles. X-ray pictures showed a great many of these dressmaker's accessories scattered about various portions of his anatomy and the strange thing was that none of them had in the least inconvenienced him during the 25 years he had been following this practice.

About six months ago, however, a man walked into one of the large New York hospitals and stated that while he was sleeping in a bed, at the head of which hung a pin cushion, he was aroused by a sharp pain in the interior portion of the left side of his chest, and told the interne he believed a needle had stuck in his body.

The man survived the operation and seemed to be on the road to recovery, when he suddenly died. An autopsy showed that the needle had punctured the left ventricle of the heart.

Fireside Philosophy

By C. M. Dickson
It is hard to reconcile the fact (but it is true) that some of the "dumbest" people in all the world have the longest tongues.

It is probably a blessing that everybody is not afraid of bullets or there would be nobody left to "cleanse" the temple.

If a person possesses the spirit of courtesy and gratitude and in addition has self respect, many smaller things will automatically come his way.

However odious comparisons may be, one never knows how large or small he is until he compares himself with some one else.

Real sportsmanship reaches far beyond the confines of the ball field or the boxing arena.

Unless a boy can be persuaded to take enough time from his French and English to practice, so far as the athletic stunts of today are concerned, the jig is up with him.

The girl who is too "domesticated" to accept all invitations to long-distance night rides, movies and bridge parties, is likely to miss the thrill of getting in contact with Reno.

It looks like that if the whole country becomes electrified that about all people will have to do is to learn to "press the button."

Man is the only animal in all christendom that has ever given God one bit of trouble.

The sin of omission is charged against a man who does less than his best.

Right says, "Control yourself"; wrong says, "Do as you please."

Pitiful is the man who is so much interested in you that he loses his

own self. An honest man will open his books to everybody. It is just as essential for a man to have some pride about his as it is for him to possess a spirit of humility. Some people act so strangely in life that as their remains lies in waiting for disposition, their neighbors feel inclined to say, "There lies a carcass."

THE DOCTOR Tells the Story

By W. E. Aughinbaugh, M. D.

FOREIGN BODIES

I doubt if there has ever lived a doctor, who at some time or other in his professional career, was not called upon to remove a foreign body from the interior of a human being.

It is most common to have children of all ages resort to the practice of inserting peas, beans, tacks, nails, pieces of stone and dirt into their nostrils and ears or else swallowing them.

Among girls, hundreds, when they wore their hair long, bit off the ends and swallowed them, in time to have these bits of hair form into a ball-shaped mass in the stomach, which often required a surgical operation to remove.

General Robert G. Dyrenforth carried a bullet he received in a Civil War engagement in his body for more than thirty years. He was wounded in the chest, and I removed the bullet from the calf of his leg.

An elderly murderer, recently executed in Sing Sing for years had been swallowing pins and needles. X-ray pictures showed a great many of these dressmaker's accessories scattered about various portions of his anatomy and the strange thing was that none of them had in the least inconvenienced him during the 25 years he had been following this practice.
