Wants New Vessel Named "Kitty Hawk"

By JIM RIVERS (Dixie News Service)

Washington, March 8.—Harold D. Cooley, representative from the Fourth North Carolina district, has written President Roosevelt and the chief of the bureau of navigation suggesting that the next airplane carrier be named "Kitty Hawk," in honor of the site of the birth of heavier-than-air aviation.

Kitty Hawk has real significance in the field of aviation not only in this country but in every section of the world, Congressman Cooley said. "No name would be more suitable for an airplane carrier, and it would be hailed by Americans and aviators in every section of the world as most appropriate."

Asks Solons To Aid Public Health Work

From his office in Raleigh, Dr. Carl V. Reynolds, state health officer, has issued the following appeal to the people of North Carolina soliciting their support for the legislative appropriation for public health work in this state:

"It is admitted, and without fear of contradiction, that the prevention of disease and the preservation of health has been, and is now, inadequately distributed. Local communities cannot deal with this mass problem unassisted. The state of North Carolina should assume its relative responsibility to insure its citizens the protection and security that can be had in no other way.

"Through taxation, and in substantial amounts and on a permanent basis, is the only sound, economic and profitable foundation upon which we can establish a comprehensive health program to meet the needs of our citizens.

"In retrospect, it does not take a patriarch the age of Methuselah to recall when there were thousands of cases of smallpox where there are none today.

"On the basis of the state's population in 1914—2,359,000—there were 829 deaths from typhoid fever, as against 47 in 1938. In 1914, there were 2,938 deaths from pulmonary tuberculosis, when we had only 1,149 in 1938. From diphtheria, there were 271 deaths in 1914, as against 120 in 1938. And I should like to call attention to the fact that these were inexcusable. In deaths attributed to malaria, there were 253 in 1914 and 52 in 1938. Diarrhea and enteritis among children under two was the cause of 1900 deaths in 1914, reduced to 887 in 1938.

"The \$499,857,936 war department appropriation bill, providing first funds to tool industry for the new air defense program, Friday received the speediest house approval on record for military appropriations.
