

MAYMEAD LIME PLANT

LEADING PRODUCERS OF
FINE AGRICULTURAL LIMESTONE

Congratulates Northwest Carolina

ON THE ESTABLISHMENT OF

BOONE'S BRIGHT BURLEY

TOBACCO MARKET

The splendid crop of bright Burley, now curing in the barns of Northwest Carolina, East Tennessee and Southwest Virginia is a splendid tribute to the honest toil of mountain farmers, and it is our hope that prices received in this fine new market will be commensurate to their labors.

MAYMEAD LIME is a contributing factor to this golden harvest. Our modern, well-equipped plant enables us to load as much as five tons of this vitalizing soil-builder in less than five minutes . . . and weights and analyses are protected by frequently-inspected scales, daily assays and a strict money-back guarantee of satisfaction.

MOUNTAIN BURLEY GROWERS have learned through long experience that legume cover crops on lands liberally sweetened with MAYMEAD LIME insure large yields of tobacco.
