merator for Watauya county in the 1940 decennial census of business and manufacturing. Mr. Williams will immediately be-sing gathering the statistics from this section on wholesale and retail trade, service establishments, amuse-ments and manufacturing enter-prises. This is the first time for many years that all of the censuses - business, manufacturing, popula-tion, agriculture, housing, mines and quartes and drainage and irrigation - will be taken in a single year. They will not all be taken at the same time. The census of business, manufactures, mines and quarries, and drainage and irrigation began January 2, some three months ahead of the counts of population, agri-culture and housing, which will be-gin on April 1, according to law. Mr. Long in announcing the ap-pointment of the enumerators said. "Gar first job is to make certain that every business man under-stands that this community's hopes for new industries, investments, paynelis and residents—in fact, all its plans—are tied up directly with getting full census reports from ev-ery business firm." He added. "We ton't want a hetter record than we want everything to which we are numer and areas." **JUNES VISITS WATAUGA** Ceca 4, Joines, native of Alle-tands that super-view industries, intersting the approxement of the salisbury consus office, was a visitor in Hooge Triday, and a tile here gave Mr. Williams a come of instruction in his new "A. City and WPA to Jointly Spend \$26,000 For Disposal Plant; Six Months Will Be Required for Completion of Work; Men Already Assigned

\$1.50 A YEAR

Work on Boone's new \$26,858 sewage disposal plant, which is made possible through joint city and WPA financing, is to start as soon as the weather will permit, according to Mr. Carson Keys, superintendent, and construction engineer, who states that 25 laborers have already been assigned to work on the proj-ect.

states that 25 laborers have already been assigned to work on the proj-cet. The job is to be finished in six months and will require the work of 79 men. An Imhoff tank 55x25 feet will be built of reinforced concrete at a point below the present sewer outlets on New River, and will in-clude large filter beds, which ac-cording to the state board of health, will prevent future contamination of water courses in the vicinity. The materials for the project will cost \$8,101, and will melude 40,000 pounds of steel, and 280 cubic yards of concrete construction. Excava-tions for the big tank will be the first work undertaken when the weather breaks, 4,200 yards of dirt being involved. The laving of 3.-900 feet of 15-inch sewer line is in-cluded in the project. The plans for the plant are ap-proved by the state health board, and the tanks should be indequate for many years to come, it is said. The city council is to ne congratu-tated upon this step, as the low water in New River had brought about a very bad condition on the river.
