V.F.W. MEETS TONIGHT

The local post of Veterans of Foreign Wars will hold a meeting tonight (Wednesday) at 7:30 at the Junior Order Hall. All members are asked to be present.

Housewives are advised that yarn from old stockings makes the best thread for mending snags and runs in other hose. Stocking yarn is less noticeable than darning thread since it is lighter in weight and its color is more likely to match.

In meeting these needs it makes the child's life purposeful, it turns his hours of idleness into constructive activity. It helps win the boys and girls to Christ and to the church. It gives the pastor a chance to know the children.

The Vacation Bible school like any other school cannot succeed unless the children enroll and attend regularly and punctually. So, your cooperation will help make the school a successful one.

If you want to know further about the school, see your pastor, Rev. J. C. Canipe, or call 181-J.

State College Hints For Home-makers

Perhaps your blankets are beginning to show the strain of banking and pulling because they were too short to begin with. If so, they'll never be a better time to lengthen them with a strip of cloth something suitable, at the bottom. Although more than 11 million yards of wool went into blankets during the last quarter of 1945, supplies are still tight.

"Mothproof" containers alone do not eliminate the pest hazard. If they're tightly enough sealed, with no cracks, they keep moths from getting in from the outside but they don't prevent any moth larvae already lurking in the clothes from doing their dirty work. Hence the necessity for having the woollens thoroughly cleaned. As an added protection, use a spray or flakes of naphthalene, or paradichlorobenzene, or moth balls—a pound for a small chest, 3 pounds for an average closet. The flakes or balls give off a gas which discourages the larvae from feeding and kills them if the concentration is high enough. As the gas is heavier than air and sinks, the flakes should be put high in the closet and renewed, if necessary.

Don't forget the wool upholstery on your furniture either. Frequent brushing and cleaning will help keep the moths away. It isn't safe to dress up your overstuffed chair and sofa with furniture covers for the summer and forget about the upholstery—not if it has wool in it. Better take a look at it once in a while, clean any spots and brush away the dust and any insect eggs that may be waiting to hatch out.

Electronic Technicians Now Needed in Navy

Due to the impending loss by demobilization the Navy faces a critical shortage in men for electronic training and are authorizing special extensive training and rapid advancement to all men enlisting for electronic training.

It is now possible for a man to advance to Petty Officer second class in only fourteen months with further prospect of advancement to Petty Officer first-class immediately.

To all men qualified for this training a total of 48 weeks training in Radio Electricians will be given

upon successful completion of this training. A candidate is a fully qualified Electronic Technician. Full information may be obtained at your Navy Recruiting Station, located in the Post Office Building at Winston-Salem, N. C. or Boone every Tuesday.
