

Seek To Regulate Federal Levies

New York.—There's a growing possibility that a constitutional convention will be called to limit taxes the federal government may collect in peacetime.

Twenty-six legislatures have passed resolutions favoring amendment of the federal tax law. Six later voted to rescind the resolution. But a question has been raised whether they can be withdrawn. If not, the action of only six more legislatures is needed for the two-thirds required for Congress to call a convention.

The Constitution has never been amended in this fashion, all changes having been initiated by Congress.

The amendment most generally proposed calls for repealing the 18th amendment — passed in 1913 and giving Congress the power to tax incomes—and substituting one putting a 25 per cent ceiling on taxes on incomes, gifts and inheritances.

But some resolutions have taken another form and seek to force the federal government to return some of its tax money to the states.

The limitations would not be in effect during wartime.

Resolutions were passed by seven state legislatures in 1951. Seven more that had not acted are meeting in 1952.

Georgia last month became the 28th state to press for tax reform. Another resolution was approved by the Virginia House of Delegates on February 5, but still needs Senate passage.

The tax amendment is being sought through Article 5 of the Constitution, which provides that Congress "on application of the legislatures of two-thirds of the states, shall call a convention for proposing amendments."

Amendments thus proposed would require ratification by 36 of the states.

The campaign to change the tax law began back in 1939 when a resolution adopted by the Wyoming legislature.

Queen Elizabeth Vital Statistics

London.—The new Queen: Full name—Elizabeth Alexandra Mary.

Title—Elizabeth, by the Grace of God, of Great Britain, Ireland and the British dominions, Beyond the Seas, Queen, Defender of the Faith.

Born—April 21, 1926, at 17 Bruton Street, London.

Married—November 20, 1947, to Lt. Philip Mountbatten, formerly Prince Philip of Greece who was created Duke of Edinburgh, Earl of Merioneth and Baron Greenwich on the same day.

Offspring — Prince Charles Philip Arthur George, born Nov. 14, 1948; Princess Anne Elizabeth Alice Louise, born August 15, 1950.

First British queen since Victoria. Third queen since the start of the 18th Century.

Angola, a new blueberry recently released by the North Carolina Experiment Station, ripens earlier than any commercial variety now grown.

High Honors for 4 No. Carolina 4-H'ers

HIGH HONORS have been accorded 4-H'ers for having the best records in the 1951 National 4-H Dress Revue, Canning, Girls' Record and Tractor Maintenance programs in North Carolina. Their awards were educational trips to the 30th National 4-H Club Congress, Chicago, November 25-29. Highlights of their records are told below.

Joseph Blackmon, 16, of Benson, has been judged state champion in the 4-H Tractor Maintenance program. His ability to maintain and operate a tractor skillfully has netted his family a sizeable saving in time, labor and money. A club member for six years, Joseph spent a year learning about farm machinery. After he worked on his tractor project for only ten months, the family purchased a tractor in the Fall of 1950, and he assumed complete care of the machine. He studied bulletins, asked questions and learned for himself the value of keeping a carburetor properly adjusted, and the oil in crankcase and transmission at the correct level. Joseph enjoys caring for this piece of equipment and has a definite program in mind for its continued upkeep with periodic checkups for repairs, adjustments and safety precautions. American Oil Co. provided his trip.

For making an outstanding record in her food preservation record in her food preservation project Glendora Nichols, 17, of Mount Airy, was named champion in the 4-H Canning Achievement program. Experimenting with new ideas, she has broadened her knowledge of better homemaking methods through her 4-H art. During seven years in club work, she completed 58 projects. Glendora's total of 2,506 quarts of food which she canned alone and 2,428 quarts canned with assistance, is an enviable one. Along with her homemaking projects which include gardening, clothing and food preparation she excels in dairy and baby beef projects. Last year she and her brother won in Dairy Production Demonstration during State 4-H Club Week. Glendora serves as Junior Leader and president of her local club, Kerr Glass farm.

All of these activities are conducted under the direction of the Extension Service of the State Agricultural College and USDA cooperating

the grand prize.

Joseph Blackmon, Glendora Nichols, Martha Cashion, Esther Hickman

simple for Esther Hickman, 16, of Chesapeake, 4-H Dress Revue winner in North Carolina. She has learned to choose, design and budget her wardrobe to suit her individual personality, and has developed poise and good grooming along the way. Because her home state is trying to promote larger cotton production, Esther chose birdseye pique for her outfit. In navy and white the four pieces, skirt, jacket, shorts and blouse can be mixed and matched. Worn to beach, for travel, or to church it is most appropriate. This capable young seamstress also made her hat, featuring a lovely flower she created by using stiffly starched pique cut to form the leaves and petals. All this for a cash outlay of \$8.79. Esther was a guest of Simplicity Pattern Co. at Chicago.

All of these activities are conducted under the direction of the Extension Service of the State Agricultural College and USDA cooperating

the grand prize.

The contest, one of the oldest of its kind in the Carolinas, was begun in 1928 by M. G. Mann, general manager of the FCX.

Director of this year's contest is Robert A. Ponton. More than 10,000 students are expected to participate this year, Ponton said.

Essays must not contain more than 2,000 words and should be written only on one side of the paper. They may be typewritten.

Finals will be held at North Carolina State College after the district eliminations.

FARM PRODUCTS

Farm products prices dipped 1.6 per cent between mid-December and mid-January, ending a three-month advance according to the Agriculture Department. Declines in prices of eggs, turkeys, cotton, cottonseed, most meat animals and citrus fruits caused the down turn.

SAVES OWN CHILD

Seattle, Wash.—Called from a shower to give aid to a 22-month-old girl, who had been pulled unconscious from a fish pond, Dr. Louis Salazar, Alaska physician who was visiting here, went to work on the limp body. He applied artificial respiration desperately and was rewarded by a cry. The child, who was revived, was his own daughter, Mary Margaret.

Aureomycin Beneficial In Dairy Calves' Diet

One of the antibiotic drugs which is known to be highly effective as a growth stimulant in pigs and poultry, is proving just as valuable in the feeding of dairy calves.

Evidence of aureomycin's potency as a growth factor in dairy calves is piling up rapidly.

Dr. L. L. Ruseff at Louisiana State University found that aureomycin improved the rate of growth and the hair coat of calves even after rumination was well established.

In tests at Pennsylvania State College, Dr. C. B. Knott found that aureomycin in the feed brought about increased growth responses up to 72 per cent of the first four weeks in dairy bull calves, most of which are now sold for veal by the nation's dairymen.

Calves receiving an aureomycin supplement gained an average of one pound per day for the first four weeks and 1.57 pounds per day for the next eight weeks, according to the published results.

Calves receiving the same diet without aureomycin average only .58 pounds per day for four weeks and 1.30 pounds per day for 12 weeks.

Dr. Knott estimated that the use of milk replacements can save at least \$10 to \$15 per calf and recommends the use of an aureomycin supplement in the formula.

Notable results have also been obtained with beef calves by Dr. J. K. Loosli at Cornell University. In his tests, beef calves receiving only ten milligrams of pure aureomycin per day averaged 14.4 pounds more at 6½ weeks than calves not receiving the antibiotic.

A marked decrease in the incidence of scours, greatest killer of calves, was also reported by Dr. Loosli.

During the 45-day experiment, each calf not receiving aureomycin scoured an average of nine days.

Those receiving aureomycin scoured an average of only two days.

Tests show that aureomycin is effective for calves in skim or whole milk as well as in milk replacements.

However, since the milk is cut down as the calf eats more starter, aureomycin supplements must be added to both liquid milk and calf starter.

To date, other antibiotics do not appear very promising for use in calf feeds.

In one of the few comparisons,

nutrition experts at Washington State College reported that "terramycin was ineffective in increasing weight gains or improving general health or condition of dairy calves."

Dr. Knott tested penicillin on calves at Pennsylvania State College with somewhat unfavorable results.

In experiments at Kansas State College to demonstrate the large margin of safety with aureomycin, the antibiotic was fed to calves at much higher doses than necessary for good growth response.

One group received 360 milligrams per day for six months, four times the normal daily recommendation. According to Dr. E. E. Bartley, the aureomycin in no case interfered with rumen function or had any harmful effects.

State College Hints For Homemakers

TIPS FOR TEEN-AGERS

Do your friends say to you, "How nice your hair looks?"

Do you keep your elbows spotless?

Do you brush your teeth at least twice a day?

Do you keep your hands off your face and hair?

Do you wash your powder puff regularly?

Do you always go to bed with a clean face?

Do you wash your stockings or socks each night after wearing?

Do you keep your stocking seams straight?

Do you keep your shoes shined and the heels straight?

Do you give your clothes a weekly check-up for spots, loose buttons and rips?

Do you give your non-washable

clothes a good airing once a week?

What about your clothes care equipment? The clothes upkeep list should include: clothes brush, shoe kit and shoe trees, dry cleaning material; clothes hangers and sewing kit.

Your clothes closet and bureau drawers should be orderly. Your handkerchiefs, gloves, dress shields, collars and cuffs, and hat bands should be clean.

Garden implements and household tools can be protected from the rust by cleaning and applying a coat of paste wax. The wax should dry before polishing. Many people prefer wax to oil as a protective agent because it doesn't wear off rapidly and is clean to apply. It also can be applied to wood handles.

Army's own air arm grows fast, may total 3,500 planes.

Farmers are using three times as much fertilizer as they did ten years ago.

It looks like a "POWER YEAR"

New Horsepower—new Brake Power—and new Power Steering blossom on Buick's ROADMASTER for 1952

MAYBE you've heard—horsepower has hit a new high on the ROADMASTER.

Brake power has done the same.

But today, we'd like to concentrate on the third member of the power trio—Buick's own version of Power Steering, available on ROADMASTERS at a moderate extra cost.

What is this Power Steering like? It's something like a helping hand, something like a "hydraulic slave"—that relieves you of all steering strain, but lets you keep command.

What we mean is this:

Power Steering is handled by a special hydraulic unit—and engineers can design this unit to take over any amount of steering effort—even to a point where the wheel seems to float in your hand.

But in that case, you'd surrender all control to

that hydraulic unit—get no steering "feel" from the wheel.

Now suppose you're telling two agile tons of automobile what to do in traffic. We think you'd like to have it know that you're in command.

And—out on the straightaway—we believe that a part of the joy you get from owning a Buick is the sensation of having something alive and eagerly willing beneath your hands.

So we're glad to announce that Buick engineers didn't spoil this thrill. They've kept the fun of driving, and simply eased the effort.

When you're rolling along smooth and straight, it takes almost no effort to keep any Buick on course. It almost steers itself, as every Buick owner knows.

But—when you want to get away from a curb

—back into a parking spot—make a turn—Buick's Power Steering comes into action, saves four-fifths of the effort required with ordinary steering. Power Steering does the extra work.

And—in case you wonder what happens if Power Steering gets out of kilter, the answer is nothing. Your Buick steers just as it always has.

That's why we've been saying, "This is Power Steering as it ought to be."

Come in. Try it out. We think you'll agree.

Designs, accessories, trim and models are subject to change without notice.

Sure is true for '52

When better automobiles are built

BUICK will build them
