Mr. and Mrs. Hurst Trivett visited Mr. and Mrs. Ivan Trivett of

SOCIAL SECURITY CHANGES

The Senate Finance Committee has approved the bill, already passed by the house, that will cover several changes. They are: to increase minimum social security, benefits, permit men to retire at 62, and make other changes in the program.

Experts estimated the bill will mean extra benefits totaling about \$780,000,000 for some 4,420,000 persons. The increase is to be met by an increase, effective January 1, 1962, of one-eighth of one percent in the social security tax rate.

Know The Weather

By E. H. SIMS

Do barometers prove good weather forecasters

A barometer alone is not a com-

plete weather forecaster. Most people assume that the movements of a barometer are considerable but the reverse is true. The movement of the arrow of a barometer is very slight.

There are times when the barometer is an unfailing instrument for warning of very bad weather

or good weather. When it is around 31, you can be certain that good weather is yours for a day or more.

If it is very low, likewise, at 29 or below, look for wind and rain. But most of the time the barometer will stay between these marks and the arrow will move

only slightly. In these times you must know the trend, have weather reports from other localities and take other factors into consideration, in forecasting the weather.

Adams urges peace-environment role for Eisenhower.

RULES ON DUES DISPUTE

The Supreme Court has concluded its current term with a major decision holding that workers compelled to be union members can't have their dues money spent for political purposes against their will.

The court, ruling in a railroad

labor case, made it clear that it was talking of a union-shop situation—one in which the workers have to be members and pay dues to a union to hold their jobs.
