

# 15 Beauties Will Compete For "Miss Watauga" Crown

Fifteen beauties will compete Saturday night, Dec. 3, for the coveted Miss Watauga County title.

## Know The Weather

BY E. H. SIMS  
 Why is it that, in most areas of the country, winter brings so many long, rainy spells? Winter produces more rainy spells of several days duration than summer for several reasons. One of the main reasons is that winter's colder earth and ever-present cold air creates more of the cloud-forming or cooling action that makes for cloud and rain. Warm air moving into cold winter air (a warm front) can set up a rainy area for hundreds of miles. Since a warm front moves forward more slowly than a cold front, this mass of cloud and rain takes several days to pass overhead. Occasionally a warm front or an occluded front will become stationary over an area, and in winter this usually means several days of bad, rainy weather. These frontal systems are of long duration but produce little lightning and thunder.
