Assn. For Retarded

To Meet On Tuesday
The Watauga County Association for Retarded Children will meet Tuesday night, Aug. 5, at 7;30 in Room 144 of Edwin Duncan Hall on the ASU campus.

A general business meeting will be conducted and all members are urged to attend and bring other interested guests.

4,000,000 Gallons A Day

First Contract Is Let On ASU Water Plant

System To Be Completed By Autumn Of 1972

Wilson and Clark Construction Co. of Johnson City, Tenn. has been awarded a \$74,672,15 contract for the initial phase of a water system expansion project estimated to cost \$2,2 million which was approved by the 1969 General Assembly for Appalachian State University.

The new system, scheduled to be in operation by the fall of 1972, is initially designed to deliver 2,000,000 gallons of water a day, But a simple filter plant expansion will double the system's potential to 4,000,000 gallons daily.

The present system produces 600,000 gallons a day from wells. The campus expects to face a water shortage, similar to the one suffered here last fall, when some 6,000 students returned to school in September. University officials are making arrangements under which the campus system may be sup-plemented during peak periods with water from the town of

In August and early Sept-ember, as the first stage of the project, Wilson and Clark will install nearly a half mile of 16-inch pipe through the center of Appalachian's campus,

Construction of the distri-bution system is being coordi-nated with a campus develop-ment and landscaping program to avoid duplication of construc-

"We would have hated to build new streets and sidewalks and later have them torn up to install the new water dis-tribution system," said Ned R. Trivette, the university's director of business affairs,

Plans are nearing completion, Trivette added, for other phases of the project which include construction of a 30-acre res-ervoir and installation of a \$400,000 filter plant,

Water will be piped from Howard's Creek, the primary sup-ply source, to the reservoir on Norris Branch. The water will then be purified and pumped

florse Show in Broyhill Park, The 1969 edition of the acclaimed four-day show gets underway. Thursday morning with two classes being run simultaneously on the spacious show grounds, Several hundred entries are expected to show for record crowds this week with championships and reserve championships being awarded Sunday afternoon. Blowing Rock normally gets a good rain storm during the show, but this year's show date begins with July 31—perhaps a good luck charm for spectators and exhibitors alike, (Staff photo)
