Timely Questions On Farm Answered

Question: What must I substitute for green feed to keep my layers in health and production?
 Answer: Where green feed is not available, a balanced laying mash reinforced with a potent fish oil should be kept before the birds at all times. The addition of from 5 to 7 1/2 percent of alfalfa leaf meal will, in most cases, provide ample insurance for the lack of this green feed. Where possible, dehydrated alfalfa leaf meal should be used. The use of this leaf meal and a good laying mash should keep the birds in a good, healthy, laying condition.

Question: Does altitude make any difference in the time of processing in canning fruits and vegetables?
 Answer: Yes. Water boils at approximately two degrees lower for every 1,000 feet above sea level and it is necessary, therefore, to cook products longer in high altitudes, as the lower temperatures will not sterilize as readily as the sea level boiling point. A table showing the proper processing time for the higher altitudes is given in Extension Miscellaneous Pamphlet No. 39, a copy of which will be sent free upon application to the Agricultural Editor at State College.

Question: When should I select my seed Irish potatoes for planting next year?
 Answer: Seed potatoes should be selected at harvest time. Go through the field just before general digging and dig separately a large number of hills, keeping the potatoes of each hill to themselves. Select the seed potatoes from those hills having the largest number of uniform tubers that are typical of the variety. Selection of the seed potatoes from the stored crop gives no assurance of good yields nor freedom from disease.

Says Dangerous Varicose Veins Can Be Reduced At Home

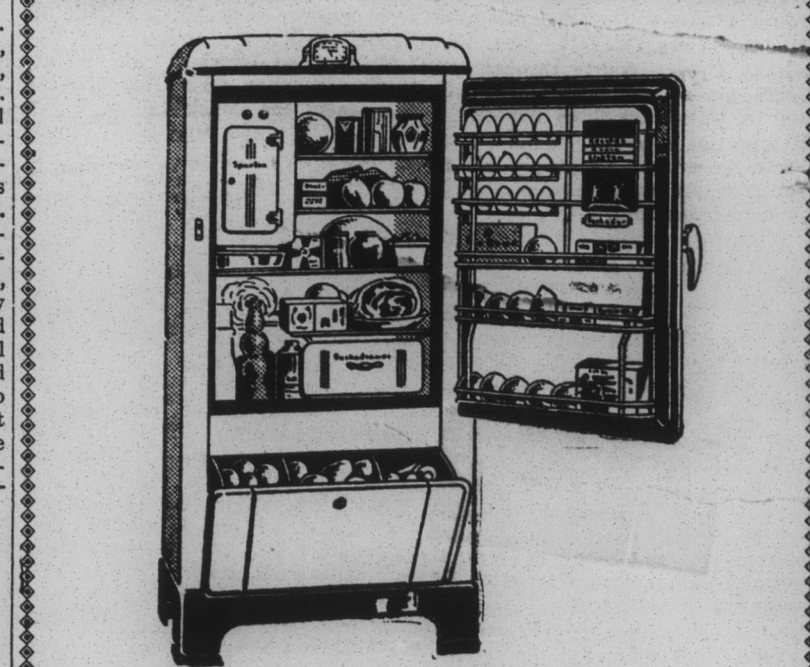

Rub Gently Upward Toward the Heart as Blood in Veins Flows That Way

If you or any relative or friend is worried because of varicose veins, or bunions, the best advice for home treatment that anyone in this world can give, is to get a prescription known as Moore's Emerald Oil.

Simply ask your druggist for an original two-ounce bottle of Moore's Emerald Oil (full strength) and apply night and morning to the swollen, enlarged veins. Soon you should notice that they are growing smaller and the treatment should be continued until the veins are no longer troublesome. So penetrating and powerful is Emerald Oil that old chronic sores and ulcers are often entirely healed.
