New Policy Adopted In Selective Service

Registrants under Selective Service whose wives have become pregnant since December 7, 1941, are no longer entitled to deferment on the grounds of dependency, the Chowan County Draft Board has been advised by the State director of Selective Service, who stated that this revised policy has been made necessary because present regulations provide that no status which was acquired on or after December 8, 1941, may be considered when deciding questions of dependency.

The Director further announces that all local boards in the State have been directed to reopen and reconsider for classification the cases of all registrants heretofore deferred on the grounds of dependency because their wives became pregnant since December 7, 1941.

The fact that a registrant is a parent shall not be considered in determining the class in which he should be placed unless the child was conceived prior to December 3, 1941, the Director said. He further stated that this ruling applies to all cases, regardless of the date of marriage, and is to be applied both in considering the classification of a registrant and in determining his category.
