One of the four United States battleships in the atomic bomb tests scheduled to be made at Bikini Atoll in the Marshall Islands will be the two-war veteran USS Nevada. For the Nevada, this test will be a return to the scene of one of her war-time targets, nearby Jaluit Atoll. During the Jap attack on Pearl Harbor, the Nevada was the only capital ship to get underway, and since then she has lent her fire power to invasions at Attu, Normandy, Southern France, Iwo Jima and Okinawa. She performed 52 missions at Normandy and five more at Cherbourg in the invasion of Southern France.
